Online Teaching and Learning in Higher Education Pedro Isaias, Demetrios G. Sampson, Dirk Ifenthaler, 2020-09-29 This book explores a variety of facets of online learning environments to understand how learning occurs and succeeds in digital contexts and what teaching strategies and technologies are most suited to this format Business health government and education are some of the core sectors of society which have been experiencing deep transformations due to a generalized digitalization While these changes are not novel the swift progress of technology and the rising complexity of digital environments place a focus on the need for further research and novel strategies In the context of education the promise of increased flexibility and broader access to educational resources is impelling much of higher education's course offerings to online environments The 21st century learner requires an education that can be pursued anytime and anywhere and that is more aligned with the demands of a digital society Online education not only assists students to successfully integrate a workforce that is increasingly digital but it helps them to become more comfortable with the use of technology in general and hence more prepared to be prolific digital citizens The variety of settings portrayed in this volume attest to the unlimited opportunities afforded by online learning and serve as valuable evidence of its benefit for students' educational experience Moreover these research efforts assist a more comprehensive reflection about the delivery of higher education in the context of online settings

School Councils across Europe Isabel Kempner, Jan Germen Janmaat, 2022-12-28 *School Councils across Europe* explores how uneven access to the democratic learning opportunity of being a representative on a school council may be both reflecting and perpetuating political inequalities found in societies across Europe Kempner and Janmaat present a new analysis of data from a major international survey on citizenship education to reveal the country school and personal characteristics that determine access to school councils The results reveal worrying inequalities based on the socio-demographic characteristics of pupils The findings in this book will therefore be of interest to those concerned with the link between education and social justice Youth political engagement is high on the agenda of governments across Europe in the face of a perceived decline in political participation amongst young people This book engages with this issue by exploring the role of education systems in building a fair and democratic society School councils offer a democratic decision-making forum for students at school and they may increase the future participation levels of these young people Yet this potential comes with the risk of widening political inequalities if access is distributed unevenly
