

## EVALUATION AND MEASUREMENT BHAGYASREE

### DEFINITION

- Evaluation is the process of ascertaining or judging the value of something by careful appraisal. Good career.
- Evaluation is the process of determining to what extent the educational objectives are being realised. — Ralph Tyler

### Philosophy of evaluation

- Each individual should receive that education that most fully allows him /her to develop his / her potential.
- Each individual should be placed that he/she should contribute to society and receives personal satisfaction in so doing.
- Fullest development of the individual requires recognition of his /her essential individuality along with some rational appraisal by him/herself and others.
- The judgements required in assessing an individual's potential are complex in their composition, difficult to make and filled with error.
- Such error can be reduced but never eliminated. Hence, any evaluation can never be considered final.
- Every form of appraisal will have critics, which is a spur to change and improvement.

### Purposes of evaluation

- Diagnosis: Identifies the weaknesses in learning among students and monitor learning progress so as to provide suggestions.
- Prediction: Predict probable future successes on certain types of tasks on the basis of present achievement or related tasks.
- Grading: Rank orders students and is usually used in terminal examination.
- Selection: Selects suitable candidates for various courses in a university. The entrance tests for various courses serve this purpose.
- Guidance: Assists student in making decisions for the future in the choices of higher studies or career.
- Exploration: Bring out the inherent capabilities of pupils such as attitudes, habits, appreciation, understanding, manipulative skills, in addition to the conventional acquisition of knowledge.
- Evaluation of the programme: Monitors the effectiveness of teaching in a particular course; find out the relevance of the objectives and effectiveness of methods used and provides a basis for the modification of the curriculum and courses.
- Evaluation of teachers: Test the efficiencies of teachers in providing learning experiences and effectiveness of instructions.
- Motivation: Help the student to become increasingly self directing in their study and activities. And it helps in selecting, giving honours, placement of students in advanced education and writing recommendations.
