

## CULTURAL DIVERSITY AND CBT

### JIMMY PETRUZZI

Since the 1970s CBT has been widely studied and implemented with diverse cultural populations. As an effective, well tolerated, and beneficial treatment to patients, and relatively easy for clinicians to learn and deliver, CBT is a good solution to establish a therapeutic alliance, are non-judgmental and empathic, and produce positive outcomes. CBT is focused on helping individuals examine their beliefs and how these beliefs influence their own feelings and behaviour. As such it is not particularly culture bound. In fact, it provides patients of minorities, and oppressed and traumatized groups the opportunity to explore their feelings and beliefs that pertain to these experiences. It is optimal if the therapist is multiculturally competent, that is, familiar with their beliefs, experiences and its impact on their personal lives. Thereby they are better able to help patients process their cognitions in such a way that the result is more liberating, adaptive and connecting.

However, some considerations that a CBT therapist has to take into account are taking the patient's history into account, and including spiritual beliefs and cultural practices. CBT is value neutral and the process is tailored to the patient's unique situation. Furthermore, the patient is empowered to set his or her own goals, which ensure that the patient's perspective is central. In dealing with multicultural patients the therapist also has to ensure that they are unbiased, non-judgmental, accepting and avoid any stereotyping. This requires frequent self-reflection, self-regulation and attention to potential issues of transference and countertransference by the therapist. It entails a conscious recognition and understanding of one's own emotions, feelings, thoughts and attitudes at the time of their occurrence.

A succinct article by Pamela Hays (1995) noted specific ways in which CBT may be particularly useful for multicultural patients:

- CBT emphasizes the uniqueness of the individual patient.
- CBT focuses on empowerment.
- CBT focuses on conscious processes and specific behaviours instead of unconscious processes and abstract ideas.
- CBT integrates assessment and monitoring throughout the course of therapy.

However, Hays also noted that CBT values certain characteristics such as assertiveness, personal independence, verbal ability and change, which may not be prioritized in many cultures. The therapist has to be aware of these potential differences and compensate where possible. However, with attention to the possible limitations CBT is a very effective evidence-based treatment across many different cultures.
