Butler,Mondrail Myrick,2019-07-15 First Generation College Student

Research Studies brings together research from a group of dynamic scholars from a variety of institutions across the United States. This extraordinary edited volume examines the first generation college student population and analyzes topics such as college choice, social experiences, dual credit on academic success, lifestyles and health status and professional identity teaching practices. The empirical studies in this book contribute greatly to the research literature regarding the role that educational leaders have in educating first generation college students. *Undergraduate Research in the Sciences* Sandra Laursen, Anne-Barrie Hunter, Elaine Seymour, Heather Thiry, Ginger Melton, 2010-07-20. Undergraduate research enhances the learning experience of students in science, technology, engineering and mathematics. *Undergraduate Research in the Sciences* offers a groundbreaking and practical research based book on the topic. This comprehensive resource addresses how undergraduate research benefits undergraduate participants including those populations that are underrepresented in the sciences. It compares its benefits with other types of educational activities and experiences and assesses its long term value to students and faculty as both a scholarly and educational endeavor. In laying out the processes by which these benefits are achieved, this important book can assist faculty and program directors with practical guidance for design and evaluation of both new and existing undergraduate research programs. Praise for *Undergraduate Research in the Sciences* This meticulous definitive study of the effects of working with a faculty member on research as an undergraduate confirms the overall value of the experience by taking us deep into the minds and actions of participants both faculty and students. As a result we now have many more compelling reasons to get more students involved with research mentors and ways to optimize the benefits for all parties. George D. Kuh, Chancellor's Professor and director, Indiana University Center for Postsecondary Research. This timely book offers a unique comprehensive analysis of undergraduate research in the sciences based on the voices of college students and faculty mentors who have participated in these voyages of discovery. As our nation struggles to train more scientists, this book will be a valuable resource for designing undergraduate research experiences that can build our country's capacity for discovery and innovation. Arthur B. Ellis, Vice Chancellor for Research, University of California San Diego. The text is written in a lucid and engaging style and will be a valuable guide to policymakers, academic administrators and faculty members who want to find ways to engage undergraduates in the real work of investigation. Judith A. Ramaley, president, Winona State University. This book is a must read for anyone who directs undergraduates in research. It presents an impressive and rigorous body of work that brings fresh insights into the field of undergraduate research. The next generation of scientists will benefit greatly from the findings and recommendations.
