Perfect Exposure (2nd Edition) Michael Freeman, 2015-11-05

This second edition of acclaimed bestseller *Perfect Exposure* looks at the way professionals address the fundamentals of photography laying out the decision making process with the absolute clarity Michael Freeman is famed for. While addressing a subject as old as photography exposure this book is fully updated to cover the influence of all the latest technology. Chapter one introduces not just the key camera settings but also the photographer's ideal decision flow a process you can easily use in your own work. Chapter two examines all the camera technology designed to assist you in capturing the perfect photo giving honest thoughts on its advantages and disadvantages. Chapter three is a complete theory and practice of exposure broken down into every shooting scenario you'll ever encounter from evenly lit scenes to those with wild contrast. Chapter four deals with developing style through exposure including ideas like high key photography silhouette and more as well as a look at the zone system pioneered by photographers like Ansel Adams in a digital context. Finally Chapter 5 looks at the powerful post processing techniques.

Mastering Canon EOS Flash Photography, 2nd Edition Nk Guy, 2016-03-18

In this updated second edition of the authoritative bestselling *Mastering Canon EOS Flash Photography* photographer NK Guy brings the book fully up to date with coverage of all the newest Canon gear that has hit the market since the first edition published in 2010. This includes coverage of the radio enabled Canon Speedlite 600EX RT and Canon Speedlite Transmitter ST-E3-RT as well as the other Speedlites that have released since the first edition's publication: Canon Speedlite 90EX, 270EX II, 320EX and 600EX. And this is the first book to cover Canon's new affordable master unit the Speedlite 430EX III RT flash. Digital cameras and flash technology have truly revolutionized photography in the 21st century. Originally seen simply as a practical way to illuminate dark scenes with portable light flash today is used for a host of creative and nuanced applications including supplementing daylight, designing complex scenes lit by multiple light sources and simply creating beautiful controllable light for portraiture. With LCD screens on DSLRs the ability to get instant feedback on lighting setups is a great help in advancing one's lighting capabilities and encouraging experimentation. However flash photography can still be a difficult artistic and technical challenge. It's simple to get that harsh deer in the headlights look from built in automatic flash but it is a far cry from beautiful light. Creating natural looking images is not nearly as straightforward. Mastering the properties of light and the ability to manipulate craft and direct it is a lifelong endeavor. Those diving into Speedlights need some help. Manuals are terse and the terminology is confusing this is where *Mastering Canon EOS Flash Photography* comes in. This is the complete book on the subject guiding you through Canon's Speedlite system from off camera portable flash to professional studio lighting. It covers the fundamentals of flash metering technology, discusses key lighting concepts and documents a wide range of Canon and third party equipment. Universal flash accessories, studio gear and radio triggers are all thoroughly covered. The book is lavishly illustrated with diagrams that demonstrate important functions and lighting

arrangements and inspiring photos that show sophisticated flash techniques Though tailored for users of Canon EOS cameras owners of other camera systems will find much valuable information as well So whether you re just getting started with flash or you ve picked up the bug for off camera lighting from such popular websites as Strobist com or you re making the leap into advanced studio work Mastering Canon EOS Flash Photography is your in depth resource Includes a foreword by David Hobby noted photojournalist and founder of Strobist com **Modern Photography** ,1972 Industrial Photography ,1969
