Stroke The Condition And The Patient:

Novel roles of non-coding brain RNAs in health and disease Hermona Soreq, 2014-10-23 Non coding RNAs ncRNAs and in particular microRNAs are rapidly becoming the focus of research interest in numerous basic and translational fields including brain research and their importance for many aspects in brain functioning merits special discussion The wide scope multi targeted and highly efficient manner of ncRNA regulatory activities draws attention to this topic by many but the available research and analysis tools and experimental protocols are still at their infancy and calls for special discussion given their importance for many aspects in brain functioning This eBook is correspondingly focused on the search for identification and exploration of those non coding RNAs whose activities modulate the multi leveled functions of the eukaryotic brain The different articles strive to cover novel approaches for identifying and establishing ncRNA target relationships provide state of the art reports of the affected neurotransmission pathways describe inherited and acquired changes in ncRNA functioning and cover the use of ncRNA mimics and blockade tools for interference with their functions in health and disease of the brain Non coding RNAs are here to stay and this exciting eBook provides a glimpse into their impact on our brain's functioning at the physiology cell biology behavior and immune levels

A New Blueprint for Brain

Health Sanjeev Sridharan, Jordan Antflick, Kaela Scott, April Nakaima, 2025-12-02 This open access book presents an integrative vision to achieve better brain health Across the globe is a growing awareness of the impact of neurological conditions and mental health on wellbeing Also as populations age the number of people impacted by brain health conditions also grows shining a light on the need for brain health solutions that are sustainable Although the knowledge of what is working for a variety of brain health conditions continues to expand we need to realize that not all solutions will come from medical research What is needed to address brain health in a more sustainable way is a better understanding of the care that community provides and how a vision of better brain health will be found by deepening our understanding of the role of community and elevating the value of their contributions Community organizations provide frontline care and have a tangible understanding of the needs that accompany the populations above This means they are well equipped to provide local and accessible care Community is a place in which brain health solutions can be delivered in a sustainable effective efficient equitable and person centered way As such the knowledge community organizations can contribute to the bigger picture of health care is important This project responds to the need to better understand community care by highlighting how the role of evaluative thinking in the community sector can help us generate evidence to navigate towards better brain health futures By first recognizing and then supporting community led care we can expand how we view and receive care Along these lines the book moves from a view of healthcare as being only delivered in hospitals and clinics to recognizing the continuum of care and integration of healthcare options It provides a space for stories of health care solutions that indeed have connected health to the social and the community sectors By exploring community interventions that have been integrated with

biomedical neuroscientific solutions we will learn how integrated sustainable solutions can be created The role of evaluation in helping facilitate the creation of such solutions also will be explored This project is a partnership between the Ontario Brain Institute and the Evaluation Centre for Complex Health Interventions and reflects our collective learnings from our work in developmental evaluation and brain health *Evaluating the Brain Disease Model of Addiction* Nick Heather,Matt Field,Anthony Moss,Sally Satel,2022-03-07 This ground breaking book advances the fundamental debate about the nature of addiction As well as presenting the case for seeing addiction as a brain disease it brings together all the most cogent and penetrating critiques of the brain disease model of addiction BDMA and the main grounds for being skeptical of BDMA claims The idea that addiction is a brain disease dominates thinking and practice worldwide However the editors of this book argue that our understanding of addiction is undergoing a revolutionary change from being considered a brain disease to a disorder of voluntary behavior The resolution of this controversy will determine the future of scientific progress in understanding addiction together with necessary advances in treatment prevention and societal responses to addictive disorders This volume brings together the various strands of the contemporary debate about whether or not addiction is best regarded as a brain disease Contributors offer arguments for and against and reasons for uncertainty they also propose novel alternatives to both brain disease and moral models of addiction In addition to reprints of classic articles from the addiction research literature each section contains original chapters written by authorities on their chosen topic The editors have assembled a stellar cast of chapter authors from a wide range of disciplines neuroscience philosophy psychiatry psychology cognitive science sociology and law including some of the most brilliant and influential voices in the field of addiction studies today The result is a landmark volume in the study of addiction which will be essential reading for advanced students and researchers in addiction as well as professionals such as medical practitioners psychiatrists psychologists of all varieties and social workers
