Structure Of Asia:

The Structure of Asia, 1976 **The Structure of Asia 1976** John Walter Gregory, 2019-02-16 At this time of narrow specialization in science it seems almost impossible to fully grasp the personality of John Walter Gregory and his impact on the evolution of geological concepts He belonged to the generation of unusual men who by their endeavors in different technical fields made the British Empire into a domain where the sun never set Gregory was a brilliant thinker endowed with the rare combination of an incredible memory for facts and a capacity for synthesis and as his explorations extended across all continents he thus became an authority on the world as a whole Nonetheless he remained modest sincere and simple and always friendly toward his peers and his students There are few scientific fields to which he did not contribute In our present world of computer language he would be characterized by the key words of geology geography engineering and sociology a combination of disciplines which today appear unthinkable In his time he was a scholar a teacher an adventurer and a man of letters as well **The Pattern of Asia** John E. Brush, 1958 **Researching Higher Education in Asia** Jisun Jung, Hugo Horta, Akiyoshi Yonezawa, 2017-09-05 This book discusses higher education research as a field of study in Asia It traces the evolution of research in the field of higher education in several Asian countries and shares ideas about the evolving higher education research communities in Asia It also identifies common and dissimilar challenges across national communities providing researchers and policymakers essential new insights into the relevance of a greater regional articulation of national higher education research communities and their further integration into and contribution to the international higher education research community as a whole **Soviet Nation-Building in Central Asia** Grigol Ubiria, 2015-09-16 The demise of the Soviet Union in 1991 resulted in new state led nation building projects in Central Asia The emergence of independent republics spawned a renewed Western scholarly interest in the region's nationality issues Presenting a detailed study this book examines the state led nation building projects in the Soviet republics of Kazakhstan and Uzbekistan Exploring the degree forms and ways of the Soviet state involvement in creating Kazakh and Uzbek nations this book places the discussion within the theoretical literature on nationalism The author argues that both Kazakh and Uzbek nations are artificial constructs of Moscow based Soviet policy makers of the 1920s and 1930s This book challenges existing arguments in current scholarship by bringing some new and alternative insights into the role of indigenous Central Asian and Soviet officials in these nation building projects It goes on to critically examine post Soviet official Kazakh and Uzbek historiographies according to which Kazakh and Uzbek peoples had developed national collective identities and loyalties long before the Soviet era This book will be a useful contribution to Central Asian History and Politics as well as studies of Nationalism and Soviet Politics **Architecturalized Asia** Vimalin Rujivacharakul, H. Hazel Hahn, Ken Tadashi Oshima, Peter Christensen, 2013-11-01 How did terms like Asia Eurasia Indochina Pacific Rim or Australasia originate and evolve and what are their connections to the built environment In addressing this question Architecturalized Asia bridges the

fields of history and architecture by taking Asia as a discursive structure and cultural construct whose spatial and ideological formation can be examined through the lenses of cartography built environments and visual narratives The first section on the study of architecture in Asia from the medieval through early modern periods examines icons and symbols in maps as well as textual descriptions produced in Europe and Asia The second section explores the establishment of the field of Asian architecture as well as the political and cultural imagining of Asia during the long nineteenth century when Asia and its regions were redefined in the making of modern world maps mainly produced in Europe The third section examines tangible structures produced in the twentieth century as legible documents of these notional constructions of Asia In exploring the ways in which Asia has been drawn and framed both within and without the continent this volume offers cutting edge scholarship on architectural history world history and the history of empires Written by architectural historians and historians specializing in Asia and European empires this unique volume addresses the connection between Asia and the world through the lenses of built environments and spatial conceptualizations Architecturalized Asia will appeal to readers who are interested in Asian architecture world architecture Asian history history of empires and world history
