*Biological Functions for Information and Communication Technologies* Hidefumi Sawai, 2011-01-11 By incorporating biologically inspired functions into ICT, various types of new generation information and communication systems can be created. Just some example of areas already benefiting from such design inspiration are network architectures, information processing, molecular communication and complex network modeling for solving real world problems. This book provides the theoretical basis for understanding these developments and explains their practical applications. Highlighted inserts appear throughout to help readers to understand the very latest topics in these emerging research fields. The book ends with a more philosophical discussion on how new ICT solutions can be found by looking at analogous systems in biology. This new way of thinking may help researchers and practitioners to apply innovative ideas in developing next generation technologies.

**Bio-inspired Information and Communication Technologies** Yifan Chen, Tadashi Nakano, Lin Lin, Mohammad Upal Mahfuz, Weisi Guo, 2020-08-10 This book constitutes the refereed conference proceedings of the 12th International Conference on Bio-inspired Information and Communications Technologies held in Shanghai, China in July 2020. Due to the safety concerns and travel restrictions caused by COVID-19, BICT 2020 took place online in a live stream. BICT 2020 aims to provide a world leading and multidisciplinary venue for researchers and practitioners in diverse disciplines that seek the understanding of key principles, processes and mechanisms in biological systems and leverage those understandings to develop novel information and communications technologies. ICT. The 20 full and 8 short papers were carefully reviewed and selected from 56 submissions. In addition to the main track targeting broad and mainstream research topics, BICT 2020 includes four special tracks with focused research topics on internet of everything, intelligent internet of things and network applications, intelligent sensor network and data driven intelligent modeling application and optimization.
