

Structured BASIC Applied to Technology

BY ROBERT L. HARRIS

Technology is a complex system. It is a system that is composed of many different parts, each with its own unique function and purpose. It is a system that is constantly changing and evolving, as new technologies are developed and old ones are discarded. It is a system that is influenced by many different factors, both internal and external.

Structured Basic Applied To Technology:

Structured BASIC Applied to Technology Thomas A. Adamson,Kenneth C. Mansfield,James L. Antonakos,1997

Assuming no prior programming experience this edition introduces the concept of structured programming through BASIC and includes coverage of QBASIC It uses BASIC to teach the good programming habits required by higher level languages such as C or Pascal and presents programming in a manner that requires consistent program structure and uses top down design It includes examples and problems presented in the context of technical applications with each area of technology clearly defined to stimulate student interest and illustrates new concepts by guiding students through fundamental examples rather than bogging them down in mathematical complexities or technical details
