## Struggle For Algeria:

**The Struggle for Algeria** Joseph Kraft, 2012-05-01 Algerian War Kelly Mass, The foundations of the Algerian War were laid more than a century before the first shots were fired in November 1954 rooted in the peculiar nature of French colonization in North Africa and the complex relationship between colonizers and colonized that developed over generations Unlike other French colonies that maintained clear distinctions between metropolitan France and overseas territories Algeria was legally incorporated as an integral part of France itself divided into three départements that were theoretically equal to any department in mainland France This administrative fiction would prove to be both the source of French determination to retain Algeria and the fundamental contradiction that made peaceful resolution of nationalist demands nearly impossible The French conquest of Algeria began in 1830 when Charles X's government seeking to distract attention from domestic political troubles launched an expedition against the Regency of Algiers under the pretext of suppressing piracy and collecting debts What began as a limited military action gradually expanded into a full scale colonial occupation that required decades of brutal warfare to complete The resistance led by figures like Emir Abd al Qadir demonstrated from the beginning that the indigenous population would not accept foreign domination without fierce struggle establishing patterns of guerrilla warfare and harsh repression that would resurface with devastating effect more than a century later The settler society that emerged in Algeria during the nineteenth century created a unique colonial situation that differed markedly from other European imperial possessions The colonies as the European settlers were known developed their own distinct identity that was neither fully French nor authentically Algerian but something new and fiercely protective of its privileged position

**The Battle for Algeria** Jennifer Johnson, 2015-12-04 In The Battle for Algeria Jennifer Johnson reinterprets one of the most violent wars of decolonization the Algerian War 1954-1962 Johnson argues that the conflict was about who France or the National Liberation Front FLN would exercise sovereignty of Algeria The fight between the two sides was not simply a military affair it also

involved diverse and competing claims about who was positioned to better care for the Algerian people's health and welfare. Johnson focuses on French and Algerian efforts to engage one another off the physical battlefield and highlights the social dimensions of the FLN's winning strategy which targeted the local and international arenas. Relying on Algerian sources which make clear the centrality of health and humanitarianism to the nationalists' war effort, Johnson shows how the FLN leadership constructed national health care institutions that provided critical care for the population and functioned as a protostate. Moreover, Johnson demonstrates how the FLN's representatives used postwar rhetoric about rights and national self-determination to legitimize their claims which led to international recognition of Algerian sovereignty. By examining the local context of the war as well as its international dimensions, Johnson deprovincializes North Africa and proposes a new way to analyze how newly independent countries and nationalist movements engage with the international order. The Algerian case exposed the hypocrisy of selectively applying universal discourse and provided a blueprint for claim making that nonstate actors and anticolonial leaders throughout the Third World emulated. Consequently, *The Battle for Algeria* explains the FLN's broad appeal and offers new directions for studying nationalism, decolonization, human rights, public health, movements, and concepts of sovereignty.

**The Algerian-French Conflict** Avraham G. Mezerik, 1958 [Algeria and France](#)

Dorothy Pickles, 2015-12-22 Beginning as a small seemingly insignificant rebellion in 1954, the Algerian struggle for independence assumed such proportions that it strangled France's foreign policy, threatened her international relations, poisoned the political atmosphere, and toppled one government after another. In this book, first published in 1963, a specialist on French affairs assesses the impact on France of the Algerian problem, the various attempts to solve that problem, and the implications of the solution finally found. It is a study of conflict, a careful consideration of the interaction between internal politics and a peculiarly difficult external problem, and most of all, an objective and lucid presentation of the essential elements of a tragic episode in French history.

**Civil Resistance and Conflict Transformation** Véronique Dudouet, 2014-09-15 This book investigates the decision-making process, rationale, and determining factors which underlie the strategic shifts of armed movements from violent to nonviolent resistance. The revival of global interest in the phenomenon of nonviolent struggle since the 2011 Arab Spring offers a welcome opportunity to revisit the potential of unarmed resistance as an alternative pathway out of armed conflicts in cases where neither military or counterinsurgency nor negotiated solutions have succeeded. This volume brings together academics from various disciplinary traditions and offers a wide range of case studies including South Africa, Palestine, and Egypt through which to view the changes from violence to nonviolence within self.

determination revolutionary or pro democracy struggles While current historiography focuses on armed conflicts and their termination through military means or negotiated settlements this book is a first attempt to investigate the nature and the drivers of transitions from armed strategies to unarmed methods of contentious collective action on the part of non state conflict actors The text concentrates in particular on the internal and relational factors which underpin the decision making process from a change of leadership and a pragmatic re evaluation of the goals and means of insurgency in the light of evolving inter party power dynamics to the search for new local or international allies and the cross border emulation or diffusion of new repertoires of action This book will be of interest to students of security studies peace and conflict studies political sociology and IR in general
