Iterated Integrals And Homotopy Periods:

Iterated Integrals and Homotopy Periods Richard Martin Hain, 1984 Of the various minimal algebraic models of a simply connected space that have been constructed in the last decade possibly the least understood and the one most suitable for application in geometry is K T Chen s non commutative algebra model In this paper we give a complete exposition of Chen s methods and extend these in two directions we establish a rational version of Chen s theory for simply connected semisimplicial complexes and we show that the set of primitive elements of Chen s model is a Lie algebra model of the space whose generators correspond to cells in the space that represent non trivial rational homology classes
