Physical Chemistry for Engineering and Applied Sciences is the product of over 30 years of teaching first year Physical

Chemistry as part of the Faculty of Applied Science and Engineering at the University of Toronto Designed to be as rigorous

as compatible with a first year student s ability to understand the text presents detailed step by step derivations of the

equations that permit the student to follow the underlying logic and of equal importance to appreciate any simplifying

assumptions made or mathematical tricks employed In addition to the 600 exercises and end of chapter problems the text is

rich in worked non trivial examples many of which are designed to be inspiring and thought provoking Step by step

derivation of all equations enables the student to smoothly follow the derivation by sight and can be understood relatively

easily by students with moderate skills and backgrounds in mathematics Clear and accessible Physical Chemistry for

Engineering and Applied Sciences includes The answers to all of the 112 worked examples 99 exercises following many of the

worked examples and 496 end of chapter problems Topics not normally seen in introductory physical chemistry textbooks

ionic reaction rates activities and activity coefficients or not regularly explained in much detail electrochemistry chemical

kinetics with an eye on industrial applications Special appendices that provide detailed explanations of basic integration and

natural logarithms for students lacking a background in integral calculus An in depth chapter on electrochemistry in which

activities and activity coefficients are used extensively as required for accurate calculations
