**Soviet Perceptions Of The Oil Factor In U.s. Foreign Policy** Herbert L. Sawyer, 2019-06-21 America's energy position and that of the West in general is vulnerable. The major source of that vulnerability is the potential that oil supplies from the Gulf could be interrupted for an extended period. The fact that during the first quarter of 1983 U.S. crude oil imports dropped to 2.8 million barrels a day mbd from 4 mbd during the same quarter in 1982 is a very substantial decrease of thirty percent from what was already a relatively low level. It is less comforting than it appears. In spite of this decrease in demand, U.S. reserve stocks could be eliminated by an increased demand for oil stemming from a vigorous economic recovery in the West. If in the context of such a recovery the members of the Organization of Petroleum Exporting Countries (OPEC) could overcome their current disagreements and introduce some discipline regarding production levels, they might be able to reestablish a tight supply situation in the world oil market. Moreover, even if such developments do not take place, there is always the chance of a major upheaval in the Middle East/Gulf region given the volatility of the area that could be disruptive enough to cause a substantial reduction in oil supplies. In this context, it must be recognized that America's energy vulnerability is inseparable from that of the West in general because of the fungibility of oil.

**Perceptions and Behavior in Soviet Foreign Policy** Richard K. Herrmann, 2010-11-23 This book discerns Soviet leaders' views of the United States and sees them in relation to foreign policy statements and actions. Herrmann first examines the subtle problem of analyzing perceptions and interpreting motives from the words and deeds of national leaders. He then turns to cases measuring the dominant U.S. hypotheses about the USSR against Soviet behavior in Central Europe, the Middle East, Africa, and Asia, as well as Soviet participation in the arms race. Finally, he weighs his conclusions against a thematic study of speeches and publications by members of the Politburo.

**US Foreign Policy Towards Russia in the Post-Cold War Era** David Parker, 2019-06-07 This book discusses how the ideas, expectations, and mind sets that formed within different US foreign policy making institutions during the Cold War have continued to influence US foreign policy making vis-à-vis Russia in the post-Cold War era, with detrimental consequences for US-Russian relations. It analyses what these ideas, expectations, and mind sets are, explores how they have influenced US foreign policy towards Russia as ideational legacies, including the ideas that Russia is untrustworthy, has to be contained, and that in some aspects the relationship is necessarily adversarial, and outlines the consequences for US-Russian relations. It considers these ideational legacies in depth in relation to NATO enlargement, democracy promotion, and arms control, and sets the subject in its wider context where other factors such as increasingly assertive Russian foreign policy impact on the relationship. It concludes by demonstrating how tension and mistrust have continued to grow during the Trump administration and considers the future for US-Russian relations.
