Holland, 1985 **Women, the State, and Development** Sue Ellen M. Charlton, Jana Matson Everett, 1989-01-01 This book reflects the most current scholarship on states socioeconomic development and feminist theory to emerge this decade Addressed are issues such as the role of state policies and ideologies in defining gender differences state influence over the boundaries between public and domestic spheres state control over women s productive and reproductive lives and the efforts of women to influence state policy *Women the State and Development* shows that state elites promote male domination as one way of maintaining social order when nation states are created and strengthened and that issues defined as male by the sexual division of labor are given priority in state policies that promote security and economic development such as foreign policy international trade agricultural development and resource extraction It analyzes these policies in terms of their impact on gender relations and also identifies ways in which women have responded Fruits of Her Plume:

Essays on Contemporary Russian Women's Culture Helena Goscilo, 2015-05-20 The 1980s witnessed the ascendancy of Russian women in multiple spheres of artistic creation including literature film and painting This volume may thus be said to engage not only women s artistic production but indeed the best and most colourful of recent Russian culture Treating contemporary Russian women s creativity it approaches women s texts films and canvasses from a range of perspectives from anti gendered to feminist Some of the essays introduce writers not previously well studied others challenge conventional interpretations and assumptions while still others yield original viewpoints through novel juxtapositions In addition to offering insights into the various artists under analysis the essays map the wide terrain of issues and methodologies proliferating in cultural criticism today and mirror the diversity that is one of the most appealing features of women s creativity in contemporary Russia **The Feminization of Poverty** Gertrude Schaffner Goldberg, Eleanor

Kremen, 1990-11-09 This comprehensive and carefully organized collection provides an overview of the relationship between gender and economic stratification in seven industrialized countries Everywhere as a Polish commentator notes men have too much power and women too much work Nevertheless these studies reveal large differences in the circumstances of women in different countries and help to illuminate the several developments in the labor market the family and public policy which explain the extreme feminization of poverty in the United States Frances Fox Piven City University of New York Lucid careful and systematic the book builds a compelling explanation for the needless impoverishment experienced by millions of American women and offers a sensible realistic agenda for its reduction Michael B Katz University of Pennsylvania This study asks whether the feminization of poverty the tendency of women and their families to become the majority of the poor is unique to the United States where the phenomenon was first discovered Seven industrialized nations both capitalist and

socialist with different degrees of commitment to social welfare are compared Canada Japan France Sweden Poland the Soviet Union and the United States In each of the countries the authors analyze information about women labor market conditions equalization policies social welfare programs and demographic variables such as the rates of divorce and single parenthood According to Goldberg and Kremen it is possible to predict the feminization of poverty when three conditions are present 1 insufficient efforts to reduce work place and wage inequities for women 2 the absence or ineffectiveness of social welfare programs which can redress the cost both economic and personal of the dual role that women have assumed in industrialized societies and 3 the presence of increasing rates of divorce and single motherhood An array of labor market and social welfare programs in use in the six other industrialized nations are then reviewed by the authors for possible adaptation in the United States This important work will be a valuable resource for scholars across the academic and professional disciplines of political science sociology economics social work and women s studies
