**Soviets in Space** Colin Turbett, 2022-01-12 The victory over Nazi Germany in 1945 in which the Soviet Union played both the greatest part and suffered the greatest losses found the country in a state of devastation Military strength could not compensate for the damage wreaked by war especially in the western areas of the USSR Within just over ten years not only was Stalin dead and the relative freedoms of the Khrushchev Thaw in progress but the Soviet Union was ahead in the Space Race beating the enormous wealth and resources of the USA launching Soviet citizens from ordinary backgrounds quite literally into worlds beyond our own The communist dream seemed alive and well The story of those years has rarely been told from a Soviet perspective Cold War journalism and historical accounts written in the West tend to portray the space race in terms of ideological competition with success and failure mirroring power and influence in a world divided between capitalism and communism Whilst the military on both sides certainly benefited from the cutting edge technological advance of the space programmes for the people of the USSR the prestige of their successes offered proof that real existing socialism was moving mankind onto new levels of peaceful progress Agriculture and railway building initiatives tried to involved ordinary people in other pioneering projects to build socialism before the dream shattered in the 1980s Extensively illustrated with images from the time this book looks at the years of Soviet space success their background the personalities involved and their impact on the ordinary people of the USSR *Salyut : Soviet steps toward permanent human presence in space.*, 2008 As the other major spacefaring nation the Soviet Union is a subject of interest to the Congress in their deliberations concerning the future of U S space activities In the course of an assessment of Civilian Space Stations in 1983 the Office of Tech Assessment OTA undertook a study of the presence of Soviets in space their Salyut space stations The major element in this technical memorandum was a workshop held at OTA in Dec 1982 it was the first occasion when a significant number of experts in this area of Soviet space activities had met for extended unclassified discussion As a result of the workshop OTA prepared this report Includes Graphic Comparison of Soviet U S Space Vehicles Illustrations

*U.S.-Soviet Cooperation in Space*, 1985 **The Politics of Space** William H. Schauer, 1976 **U.S.-Soviet cooperation in space.**, 1985 Space holds a fascination for all of us For many it represents a final physical frontier a place to explore the very essence of knowledge to experiment with new technology and to seek new levels of human adaptation and change As the major spacefaring nation on our planet the United States has taken special pride in our achievements in space Discoveries in space science have already added immensely to our fund of knowledge U S scientists have moved quickly to take advantage of new opportunities for learning and the future of scientific work in space is virtually unlimited Given the promise of space an additional issue comes to the fore How can the United States proceed in space in relation to the other principal spacefaring nation and superpower the Soviet Union What is to be gained or lost by working together in space With regard to science in particular can the two countries benefit from joint efforts Can the two countries cooperate as well as

compete Since the beginning of the space age the two countries have been examining these questions This study was requested by Senators Matsunaga Mathias and Pell as a means to shed light on the subject at the time of the 10th anniversary of the major U S Soviet cooperative endeavor the Apollo Soyuz Test Project OTA is pleased to be able to provide this technical memorandum outlining the principal issues of the debate the history of cooperation and the experience of France another country involved in space cooperation with the U S S R Additional OTA documents that may be of interest include Civilian Space Stations and the U S Future in Space Salyut Soviet Steps Toward Human Presence in Space and International Cooperation and Competition in Civilian Space Activities OTA studies in the areas of technology transfer are cited in the text

**Soviet and Russian Lunar Exploration** Brian Harvey, 2007-08-17 When in July 1969 the Americans decisively beat the Soviet Union in the race to put an astronaut on the moon this event had profound historical scientific and political implications This book tells the story of the Soviet and Russian lunar programme from its origins to the reconsideration of a lunar programme in the present day federal Russian space programme Following Sputnik the first Soviet lunar flights achieved the key goals of hitting circling and photographing the moon in 1959 The Soviet Union planned to achieve the biggest prize of them all the first person to land on the moon and built all the key spaceships required to do so such as a lunar orbiter and lander Brian Harvey describes the techniques devised by the USSR for lunar landing from the LK lunar module to the LOK lunar orbiter and tested versions in Earth orbit He asks whether these systems would have worked and examining how well they were tested concludes that they would have the Soviet Union lost the moon race for political not technical reasons Designs for moon bases were even drawn up In the end the Soviet Union ran an impressive series of robotic missions from 1968 to 1976 to circle the moon map the far side conduct scientific observations from orbit recover samples and rove over the surface The scientific haul from these missions is surveyed what was actually learned about the moon its rocks and the lunar environment that will be useful for the present plans by the United States to return to the moon and for other countries such as India and China to conduct their own lunar exploration The book opens in Surgut Siberia in August 1976 with a largely forgotten event the return to Earth after a three day journey from the moon under a single parachute of the tiny Luna 24 cabin with a core sample drilled deep into the Sea of Crises a remarkable scientific and engineering achievement It ends with an examination of projected missions from plans to explore the far side and set up lunar observatories to the Luna Glob explorer of the 1990s There is also discussion of lunar tourism using a modernized version of the Zond spacecraft which flew around the moon from 1968 to 1970

United States. Congress. Office of Technology Assessment,1983      Race Into Space Brian Harvey,1988      **Soviet Space Mythologies** Slava Gerovitch,2015-06-18 From the start the Soviet human space program had an identity crisis Were cosmonauts heroic pilots steering their craft through the dangers of space or were they mere passengers riding safely aboard fully automated machines Tensions between Soviet cosmonauts and space engineers were reflected not only in the internal development of the space program but also in Soviet propaganda that wavered between praising daring heroes and flawless technologies Soviet Space Mythologies explores the history of the Soviet human space program within a political and cultural context giving particular attention to the two professional groups space engineers and cosmonauts who secretly built and publicly represented the program Drawing on recent scholarship on memory and identity formation this book shows how

both the myths of Soviet official history and privately circulating counter myths have served as instruments of collective memory and professional identity These practices shaped the evolving cultural image of the space age in popular Soviet imagination Soviet Space Mythologies provides a valuable resource for scholars and students of space history history of technology and Soviet and post Soviet history U.S.-Soviet Cooperation in Space Dodd L. Challenge to Apollo Asif A. Siddiqi, 2000 **Cold War Space Sleuths** Dominic Phelan, 2012-11-28 Space Sleuths of the Cold War relates for the first time the inside story of the amateur spies who monitored the Soviet space program during the Cold War It is written by many of those space sleuths themselves and chronicles the key moments in their discovery of hidden history This book shows that dedicated observers were often better than professionals at interpreting that information coming out of the USSR during the dark days of the Cold War This book takes a unique approach to the history of Soviet spaceflight looking at the personal stories of some of the researchers as well as the space secrets the Soviets tried to keep hidden The fascinating account often reads like a Cold War espionage novel Space Sleuths of the Cold War includes an impressive list of contributors such as Editor Dominic Phelan giving an overall history of the Cold War hunt for Soviet space secrets Space writer Brian Harvey reveals his own personal search through official Soviet radio and magazines to find out what they were and weren't revealing to the outside world at the height of the space race Sven Grahn from Sweden details his own 40 year quest to understand what was happening on the other side of the Iron Curtain Professional American historian Asif Siddiqi explores his own adventures in the once secret Russian archives often seeing documents never before read by Westerners Dutch cosmonaut researcher Bert Vis provides an inside account of the Yuri Gagarin training center in Moscow Belgian researcher Bart Hendrickx's details his important translation of the 1960s diaries of cosmonaut team leader General Kamanin Pioneer space sleuth James Obergs shares his memories of his own notable scoops Paris based writer Christian Lardier recounts the efforts of French space sleuths whose work was frequently overlooked in the USA and Britain because of the language barrier **Space Race** Martin J. Collins, 1999 The space race grew out of the Cold War between the United States and the Soviet Union the most powerful nations after World War II For a half century they competed for primacy in a global struggle Space was a crucial arena for this rivalry Before a watchful world each side sought to demonstrate its superiority through impressive feats in rocketry and space flight Meanwhile secret satellites were developed to keep a war eye on the adversary At the Cold War's end the United States and Russia agreed to build a space station and pursue other joint ventures in space A contest that had begun in fear and enmity ended in partnership Drawing on recently declassified material and featuring a wide variety of U S and Soviet artifacts Space race examines the spectacular publicly celebrated milestones of our first steps into space as well as highly secret efforts to spy on adversaries from high above the Earth In compelling photographs and terse informed text this book tells the story of time when the superpowers sought to make the heavens inseparable from the earth Soviet Russias Space Program During the Space Race Charles River

Editors, 2015-12-14 Includes pictures Profiles the various space missions the Soviets conducted during the 1950s and 1960s Includes footnotes online resources and a bibliography for further reading Includes a table of contents This is Moscow This is Moscow calling On the 12th of April the Soviet Union orbited a spaceship around the Earth with a man on board The astronaut is a Soviet citizen Major Gagarin Yuri Alekseyevich The World's first cosmonaut The first to open the door into the unknown The first to step over the threshold of our homeland The whole planet knew him and loved him Of all the goals the Bolshevik Revolution aimed to bring about perhaps nowhere were Russian promises delivered on more than in the success of the Soviet Space program of the 1950s and 1960s As a result of Russian innovation and technology but also due to incredible drive to modernize and compete with the United States for world power Russia was finally and triumphantly modernized in the eyes of her own people and the world Neil deGrasse Tyson recognized the Soviet legacy in space in his *Space Chronicles* citing the Soviets important measures of space achievement first spacewalk longest spacewalk first woman in space first docking in space first space station longest time logged in space In fact the Soviet Union spent much of the 1950s leaving the United States in its dust and rocket fuel President Eisenhower and other Americans who could view Soviet rockets in the sky were justifiably worried that Soviet satellites in orbit could soon be spying on them or even worse dropping nuclear bombs on them Dovetailing off their success developing intercontinental ballistic missiles the Soviets were the first to make enormous advances in actual space exploration and on the night of October 4 1957 the Soviets prepared to launch Object D atop one of its R 7 rockets As the world's first ICBMs R 7 rockets were built primarily to carry nuclear warheads but Object D was a far different payload Object D and the R 7 rocket launched from a hastily constructed launch pad and within minutes it entered orbit It took that object now more famously known as Sputnik 1 about 90 minutes to complete its orbit around the Earth speeding along at 18 000 miles per hour while transmitting a distinct beeping noise by radio Eventually the Space Race produced some of the most iconic moments of the 20th century including the landing of the first men on the Moon and today the race is widely viewed poignantly and fondly as a race to the Moon that culminated with Apollo 11 winning the race for the United States In fact it encompassed a much broader range of competition between the Soviet Union and the United States that affected everything from military technology to successfully launching satellites that could land on Mars or orbit other planets in the Solar System Moreover the notion that America won the Space Race at the end of the 1960s overlooks just how competitive the Space Race actually was in launching people into orbit as well as the major contributions the Space Race influenced in leading to today's International Space Station and continued space exploration Soviet Russia's Space Program During the Space Race The History and Legacy of the Competition that Pushed America to the Moon chronicles the history of Russia's space development and the competition it fostered Along with pictures of important people places and events you will learn about the Russian space program like never before in no time at all *The Soviet Manned Space Programme* Phillip Clark, 1988 Traces the development of the Soviet space program from Sputnik to the Mir space station and looks at

future Soviet plans for the exploration of space      **The Soviet Space Programme** Ronald D. Humble, 2024-04-12 The Soviet Space Programme 1988 presents a comprehensive overview of the Soviet space programme from its beginnings up to the end of the 1980s One important theme explored is the degree to which the Soviet space programme was oriented towards military capabilities The book concludes that the degree of military involvement was indeed high      **Soviet Space Culture** E. Maurer, J. Richers, M. Rüthers, C. Scheide, 2011-08-16 Starting with the first man-made satellite Sputnik in 1957 and culminating four years later with the first human in space Yuri Gagarin space became a new utopian horizon This book explores the profound repercussions of the Soviet space exploration program on culture and everyday life in Eastern Europe especially in the Soviet Union itself      Challenge to Apollo Asif A.
