## **Space Winners:**

**Space Winners** Gordon R Dickson, 2011-09-29 They were humanity's hope the first young people selected to leave Earth for study in the Galactic Federation But something went wrong in deep space Terribly wrong Suddenly Jim Rawlins Ellen Bouvier Curt Harrington and the squirrel like Alien philosopher Peep were castaways stranded on the quarantined planet of Quebahr with no training and little hope of rescue Between them and the Federation's emergency beacon were primitive Mauregs aggressive Walats lizard like Noifs plus danger conspiracy and the mystery of an impending high tech war on a backward peaceful planet Without warning the future of the two worlds Earth and Quebahr depended on three young humans ability to adapt and survive

**Winning** Francesco Duina, 2013-08-25 Why winning doesn't always lead to happiness Most of us are taught from a young age to be winners and avoid being losers But what does it mean to win or lose And why do we care so much Does winning make us happy Winning undertakes an unprecedented investigation of winning and losing in American society what we are really after as we struggle to win our collective beliefs about winners and losers and much more Francesco Duina argues that victory and loss are not endpoints or final destinations but gateways to something of immense importance to us the affirmation of our place in the world But Duina also shows that competition is unlikely to provide us with the answers we need Winning and losing are artificial and logically flawed concepts that put us at odds with the world around us and ultimately ourselves Duina explores the social and psychological effects of the language of competition in American culture Primarily concerned with our shared obsessions about winning and losing Winning proposes a new mind set for how we can pursue our dreams and in a more satisfying way find our proper place in the world

**Space Education**, 1981 Green Landscapes in the European City, 1750-2010 Peter Clark, Marjaana Niemi, Catharina Nolin, 2016-12-08 Green space is a fundamental concept for understanding modern and contemporary urban society shedding light not only on the ecological development of cities but also societal relations urban governance and planning processes Closely linked to issues of environmental change changing perceptions of nature urban well being and social integration as well as city economic competitiveness and branding it is an important element both in the internationalisation of European cities and the forging of their distinctive communal identities Building upon recent research on the history of green landscapes in the city in Europe and North America this volume mirrors the burgeoning global attention to urban green space developments from city policy makers and planners architects climatologists ecologists geographers and other social scientists Taking case studies from Paris London Berlin Helsinki and other leading centres the volume examines when why and how green landscapes evolved in major cities and the extent to which they have been shaped by shared external forces as well as by distinctive and specific local needs Quantifying green space trends in this way raises important issues of classification and categorisation of the different varieties of urban green space While urban parks have received considerable coverage many other smaller less prestigious spaces have been largely ignored This volume argues that green landscapes

can only be properly understood when the full range of spaces from parks to recreation grounds housing areas allotments and domestic gardens is taken into account Adopting a broader approach to urban green space helps put European developments during the 19th and 20th centuries into a global perspective      **Science Fiction and Fantasy Literature, Vol 1** R.
