century Space Age Part II delves into the diverse techniques and subgenres of space art where you will learn about things like rocks and balls hardware art and cosmic expressionism Along the way we ll stop at places where neither humans nor spacecraft can easily go from the scorching surface of Venus and the radiation soaked volcanoes of Io to the alien terrain of exoplanets and the depths of distant galaxies Featuring hundreds of original color images from space artists and astronomers alike this book is a vivid visual story about the power of art astronomy and human curiosity A heavily revised edition of the original *Beauty of Space* it will entertain educate and inspire anybody who yearns to make sense of the strange and surreal sights in our universe     *Special Effects* Michele Pierson,2002-05-23 Designed to trick the eye and stimulate the imagination special effects have changed the way we look at films and the worlds created in them Computer generated imagery CGI as seen in Hollywood blockbusters like Star Wars Terminator 2 Jurassic Park Independence Day Men in Black and The Matrix is just the latest advance in the evolution of special effects Even as special effects have been marveled at by millions this is the first investigation of their broader cultural reception Moving from an exploration of nineteenth century popular science and magic to the Hollywood science fiction cinema of our time *Special Effects* examines the history advancements and connoisseurship of special effects asking what makes certain types of cinematic effects special why this matters and for whom Michele Pierson shows how popular science magazines genre filmzines and computer lifestyle magazines have articulated an aesthetic criticism of this emerging art form and have helped shape how these hugely popular on screen technological wonders have been viewed by moviegoers     Subject Catalog, 1979 Library of Congress,1979     **Art Index Retrospective ,1980**     **Bowker's Guide to Characters in Fiction ,2003**
