Space Time And Medicine:

Space, Time, and Medicine Larry Dossey, 1982-04-12 What we call modern physics says something entirely new about the world and how it behaves For many years these theories have been accepted as the most accurate descriptions we have ever had about our world Nevertheless medicine has been reluctant to incorporate these ideas into itself continuing to view the body as a clockwork mechanism in which illness is caused by a breakdown of parts Drawing on his long experience in the practice of internal medicine and his knowledge of modern science Dr Dossey shows how medicine can and must be updated Discussing the new theories of Bell Godel and others he opens up startling questions for medicine Could the brain be a hologram in which every part contains the whole Why have ordinary people been able to raise and lower blood pressure at will control heart rate body temperature even one minute blood vessel in a way no one can explain What is the role of consciousness in health and illness Perhaps the most startling of Dr Dossey's discussions concerns nonlinear time There is evidence that our obsession with time and our belief that time flows a belief refuted by the new physics may profoundly affect our health Time sickness is becoming an accepted medical concept a possible cause of the greatest killer of all heart disease Dr Dossey presents remarkable clinical data showing that by changing their view of time people have been able to positively affect the course of disease Just as the clockwork picture of the universe was abandoned in the onslaught of new data our mechanistic view of health and illness will give way to new models which too will be more consistent with the true face of the universe

Space, Time, & Medicine Larry Dossey, 1982 He and his sidekick Shih Te are known as the laughing ragged pair who left their poetry on stones trees farmhouses and monastery walls calling others to the Cold Mountain way of simple honest joyful living J P Seaton takes a fresh look at these poets as well as at Wang Fan chih who followed in the outsider tradition a few centuries later Forceful and wry all three condemn the excesses of mind and matter that prevent people from attaining true enlightenment With a comprehensive introduction and commentary throughout this collection points to where in a world that's always moving and so full of suffering stillness and clarity can be found
