*Story Index, 1950-1979* Marilyn P. Fletcher,1981    *Time, Innovation and Mobilities* Peter Frank Peters,2006-07-13 In social  
theory and sociology time and travel in technological cultures is one of the new and challenging research topics in the  
mobilities turn Yet surprisingly contemporary practices of mobility have till now seen only limited theorization within these  
disciplines By analyzing historic and contextualized transit practices this revealing book argues that travel cannot now simply  
be reduced to getting from A to B it is an integrated part of everyday life In this area researching how problems can be  
identified as dilemmas and reformulated as design problems helps create a new vocabulary one which will not only change  
the agenda in the debate on mobility problems in the public domain but will also suggest new ways of theorizing mobility  
innovations In this fascinating book author Peters develops a conceptual framework to study contemporary transit practices  
and evaluate innovation strategies gives new insights regarding historic and contemporary design strategies and regarding  
innovations related to travel in technological cultures gives special attention to electronic timespaces and ICT based mobility  
innovations investigates cases of travel in technological cultures car travel air travel and cycling in Dutch towns An original  
and provocative contribution to the emerging field of mobilities this book will become an essential resource for advanced

Contemporary American landscape is wrought with ongoing processes and phenomena of technicization observable at the  
intersections of multiple layers of society This book brings to attention their cultural and political aspects emphasizing  
timeliness and necessity of academic intervention into and evaluation of their specificity and ramifications Presenting critical  
and analytical account of cultural narratives which define speak of and use diverse technologies of writing sound media  
representations surveillance war the texts compiled in this volume investigate the coalescence between technological  
production on the one hand and the textual on the other The idea of the book responds to the current academic appeal  
inspired by postmodern questioning of the foundations and realized most importantly by deconstruction to dismantle one of  
the constitutive pillars of Western civilization namely between techne and episteme In their interpretative mode the texts  
proceed largely experimentally bridging the gap between techne and episteme In doing so they endeavor to reformulate and

complexify an experience of American culture The book aims to clarify and exemplify that the junction of text and technology implies that meanings are embedded in a material Consequently the publication introduces and popularizes the assumption that American cultural experience emerges as a genuine experiment of an esthetic nature *Tale of the Future, from the Beginning to the Present Day*, 1978
