Autobiographical memory and photography have been inextricably linked since the first photographs appeared during the 19th century These links have often been described from each other s discipline in ways that often have led to misunderstandings about the complex relationships between them The Handbook of Research on the Relationship Between Autobiographical Memory and Photography covers many aspects of the multiple relationships between autobiographical memory and photography such as the idea that memory and photography can be seen as forms of mental time and the effect photography has on autobiographical memory Covering key topics such as identity trauma and remembrance this major reference work is ideal for industry professionals sociologists psychologists artists researchers scholars academicians practitioners educators and students Encyclopedia of nineteenth-century photography John Hannavy,2008 The first comprehensive encyclopedia of world photograph up to the beginning of the twentieth century It sets out to be the standard definitive reference work on the subject for years to come

Vital Memory and Affect Steven Brown,Paula

Reavey,2015-06-12 Vital Memory and Affect takes as its subject the autobiographical memories of vulnerable groups including survivors of child sexual abuse adopted children and their families forensic mental health service users and elderly persons in care home settings In particular the focus is on a particular class of memory within this group recollected episodes that are difficult and painful sometimes contested but always with enormous significance for a current and past sense of self These vital memories integral and irreversible can come to appear as a defining feature of a person s life In Vital Memory and Affect authors Steve Brown and Paula Reavey explore the highly productive way in which individuals make sense of a difficult past situated as they are within a highly specific cultural and social landscape Via an exploration of their vital memories the book combines insights from social and cognitive psychology to open up the possibility of a new approach to memory one that pays full attention to the contextual conditions of all acts of remembering This path breaking study brings together a unique set of empirical material and maps out an agenda for research into memory and affect that will be important reading for students and scholars of social psychology memory studies cultural studies philosophy and other related fields
