

The background is a dark green chalkboard filled with various mathematical sketches and formulas. In the top left, there is a coordinate system with x and y axes and a curve. To its right are the formulas a^2 and $\sin^2 \alpha + \cos^2 \alpha$. Below a^2 is the equation $2 \times 3 = 6$. In the bottom left, there is a triangle with sides labeled a , b , and c , and the formula $a^2 + b^2 = c^2$. In the bottom center, there is a 3D pyramid and the formula $\sqrt{2}$. In the bottom right, there is a cube and the equation $2 + 2 = 4$. A large, tilted abacus with colorful beads (orange, yellow, green, red) is positioned diagonally across the center of the image.

Mathematics Performance in Primary Schools Great Britain: Parliament: House of Commons: Committee of Public Accounts, 2009 In 2007 08 the National Strategy to improve performance in primary mathematics cost some 104 million to implement The Strategy aims to raise performance through extensive teaching and learning resources supported by professional development programmes for teachers In 2006 07 some 2 3 billion was spent on teaching mathematics in

primary schools out of a total expenditure of 10 billion on primary teaching and teaching support staff Yet improvements in the mathematics results of primary school pupils have levelled off since 2000 In 2008 79 per cent of pupils met the Government's expected standard at Key Stage 2 age 11 This means that over one in five children are starting secondary school without a secure foundation in mathematics There are persistent gaps in the mathematics performance of primary school pupils from different backgrounds and with different characteristics In contrast to other subjects boys are making more progress than girls The biggest attainment gap 18 percentage points is related to deprivation Performance varies across England and between local authorities with the percentage of pupils achieving the expected standard at KS2 ranging from 70 to 87 per cent The Primary National Strategy has contributed to improvements in primary mathematics teaching and learning but weaknesses persist in vital areas such as the use and application of mathematics to real life situations and the assessment of pupils progress The lack of depth in subject knowledge of many primary school teachers and the lack of take up of continuing professional development in mathematics are major concerns which the Department has only recently begun to address through a ten year programme to train 13 000 specialist teachers
