*With a foreword by Judy Collins*

# Suicidal Mind

**David Lester**

## **Suicidal Mind:**

*The Suicidal Mind* Edwin S. Shneidman, 1998 Presenting cases recounted in the patients own words that reveal the inner workings of the suicidal mind Shneidman looks at suicide from a psychological perspective He offers a wealth of insights to help understand and to prevent suicide    *Psychotherapy with Suicidal People* Antoon A. Leenaars, 2004-05-14 Almost a million people die by suicide every year WHO estimate The sheer numbers have made suicide prevention a major health target but effective prevention is not straightforward Suicide is a complex event more complex than most of us imagine calling for an equally complex response Psychotherapy with Suicidal People provides a multi component approach with rich clinical data including many case histories to guide the reader Based on decades of research from across the globe Antoon A Leenaars takes the reader into the mind of the suicidal person from the young to the elderly from the anonymous to the famous There is no better way to know and thus to treat a person A plethora of special features makes this volume an international classic and includes Reflections of many suicidologists such as Heraclitus Plato Sigmund Freud Emile Durkheim and Edwin Shneidman A unique window on the clinical mind of the author Empirically supported definition with applications across age gender historical time as well as culture The report of the International Working Group on Ethical and Legal Issues in Suicidology Psychotherapy with Suicidal People A Person centred Approach is essential reading for clinical psychologists psychiatrists and their trainees and all clinicians who work with suicidal people    **Suicide** David Lester Ph.D., James R. Rogers, 2013-10-29 Intended for the general reader this masterful compilation probes the psychology of suicide revealing the latest research and spotlighting global efforts to reduce the million suicide deaths each year Exceeding previously available studies in both scope and depth the two volume Suicide A Global Issue explores and explains both why suicides and suicide attempts occur and what can be done to prevent them The first volume Understanding considers factors that may play into the choice to take one's life discussing forces as varied as culture psychology religion and biology The second volume Prevention covers steps that can be taken to prevent suicide whether individually or by society as a whole Articles by widely respected experts consider questions such as why people kill themselves why some countries have extremely high suicide rates and whether the treatment of suicidal individuals actually prevents them from taking their lives Each chapter presents incidents research and actions from nations around the globe as well as from the United States

*Empathy in Clinical Psychiatry and Mental Health Care* , 2025-10-07 Empathy in Clinical Psychiatry and Mental Health Care focuses on empathy in clinical psychiatry and mental health care bringing together the challenging reality of day to day clinical mental health work with conceptual and neuroscientific work on empathy Such an interface is crucial because empathy is both ethically and epistemically central to mental health care Mental health professionals effort of trying to understand the distressing experiences of patients will help instil a sense of dignity and respect for their suffering Empathy is also epistemically central to psychiatry because the knowledge gained through the empathy effort helps to inform the

collaborative care plan to be developed with the patient The book's first section sets the conceptual epistemological and social neuroscience scene including and acknowledging empathy's potential risks and problems Its second section addresses empathy's role in medicine descriptive psychopathology psychological interventions as well as the neurobiological basis of its disorders The third section examines empathy in clinical situations such as psychosis suicidal behaviour personality disorders alcohol or substance use disorders forensic psychiatry and the care of autistic people Its final section describes the role of empathy in the work of mental health nurses occupational therapists clinical psychiatrists and mental health law lawyers with a final chapter covering empathy in mental health care interventions provided by conversational artificial intelligence The book closes with a call to place clinical empathy at the centre of mental health care provision and research to increase effectiveness outcomes and patient experience

**Phenomenology of Suicide** Maurizio Pompili,2017-10-10 This book will

help the reader to understand the suicidal mind from a phenomenological point of view shedding light on the feelings of suicidal individuals and also those of clinicians In accordance with the importance that the phenomenological approach attaches to subjectivity and sense of self as the starting points for knowledge emphasis is placed on the need for the clinician to focus on the subjective experiences of the at risk individual to set aside prior assumptions judgments or interpretations and to identify ways of bridging gaps in communication associated with negative emotions The vital importance of empathy is stressed drawing attention to the insights offered by neuroimaging studies and the role of mirror neurons in social cognition It is widely acknowledged that when a clinician meets a person who wants to die by suicide the clinician does not fully understand what is going on inside the mind of that individual This book recognizes that any approach to suicide prevention must promote understanding of suicidal thoughts and feelings The awareness that it fosters and the innovative perspectives that it presents will appeal to a wide readership

**New Directions in Psychiatry** Maurizio Pompili,Roger McIntyre,Andrea

Fiorillo,Norman Sartorius,2020-06-08 This book focuses on hot issues faced by clinicians in everyday clinical practice and provides in depth analyses of both met and unmet needs in the management of psychiatric disorders It has been repeatedly shown that the needs of patients relatives the community at large and those of the governmental bodies only partially overlap For instance patients in their families are more concerned about quality of life treatment autonomy and independent living whereas governmental stakeholders are typically more concerned about relapse prevention and reduction of hospitalizations As such a volume bridging the gap between theoretical notions and practical understanding of patients untreated aspects of their psychiatric disorders is much needed Instead of focusing on traditional descriptions of psychopathology and diagnostic criteria the volume guides readers to core problems for each topic taking into account new approaches in the classification of mental disorders as proposed by DSM 5 It elaborates on much debated controversial problems such as the assessment and treatment of psychomotor agitation and non adherence to treatment that impacts on the psychiatric context With its unique approach this volume appeals to anyone with an interest in the field including researchers clinicians and trainees

**Cry of**

Pain Mark Williams,2014-07-03 Suicide presents a real and often tragic puzzle for the family and friends of someone who has committed or attempted suicide Why did they do it How could they do this Why did they not see there was help available For therapists and clinicians who want to help those who are vulnerable and their families there are also puzzles that often seem unsolvable What is it that causes someone to end his or her own life or to harm themselves is it down to a person s temperament the biology of their genes or to social conditions What provides the best clue to a suicidal person s thoughts and behaviour Each type of explanation seen in isolation has its drawbacks so we need to see how they may fit together to give a more complete picture *Cry of Pain* examines the evidence from a social psychological and biological perspective to see if there are common features that might shed light on suicide Informative and sympathetically written it is essential reading for therapists and mental health professionals as well as those struggling with suicidal feelings their families and friends

***The Pathology of Mind*** Henry Maudsley,1894      ***Responsibility in Mental Disease*** Henry Maudsley,1892      ***Clinical lectures on mental diseases*** Sir Thomas Smith Clouston,1898      ***The Journal of Mental Science*** ,1899 Vol 77 includes Yearbook of the Association 1931      *Cry of Pain* J. Mark G. Williams,Mark Williams,2014-07-03 Suicide presents a real and often tragic puzzle for the family and friends of someone who has committed or attempted suicide Why did they do it How could they do this Why did they not see there was help available For therapists and clinicians who want to help those who are vulnerable and their families there are also puzzles that often seem unsolvable What is it that causes someone to end his or her own life or to harm themselves is it down to a person s temperament the biology of their genes or to social conditions What provides the best clue to a suicidal person s thoughts and behaviour Each type of explanation seen in isolation has its drawbacks so we need to see how they may fit together to give a more complete picture *Cry of Pain* examines the evidence from a social psychological and biological perspective to see if there are common features that might shed light on suicide Informative and sympathetically written it is essential reading for therapists and mental health professionals as well as those struggling with suicidal feelings their families and friends      ***Suicide*** G. A. Shurtliff,1877      ***A Manual of Psychological Medicine*** John Charles Bucknill,Daniel Hack Tuke,1879      ***Clinical Manual for Assessment and Treatment of Suicidal Patients*** John Chiles,2005 The authors combine their diverse training and disciplinary backgrounds to create a workable approach to dealing with suicidal patients Much more than merely an academic text on suicide this thought provoking handbook provides detailed guidance and a true sense of what to do to help suicidal patients      ***THE "I" OF THE STORM*** David Lester,2014-01-01 We cannot explain why people kill themselves There are no necessary or sufficient causes for suicide so rather than explaining suicide looking for causes perhaps we can understand suicide at least in one individual a phenomenological approach This book begins by examining the diaries from eight individuals who killed themselves Using qualitative analyses supplemented in some cases by quantitative analyses Lester seeks to uncover the unique thoughts and feelings that led these individuals to take their own lives Lester has also studied suicide notes the poems of those who died by

suicide both famous poets and unpublished poets the letters written by suicides blogs and twitter feeds and one tape recording of a young man who killed himself just an hour or so after he recorded the tape This book will give you insights into the I of the storm the suicidal mind David Lester has PhD s from Cambridge University UK and Brandeis University USA He is a former President of the International Association for Suicide Prevention and a leading scholar on suicide murder the fear of death and other topics and thanatology    Essentials of Legal Medicine, Toxicology and Hygiene Charles Edward Armand Semple,1892    *The Battle Inside My Suicidal Mind* Estelle Nadia,2019-06-30 Have you ever been affected by suicide or are you struggling with suicidal thoughts Maybe you would like to understand better what motivates someone to end their life Struggling with suicidal thoughts was part of my daily routine I had reached a point where it felt more and more like there was no place for me in this world and ending my life seemed to be the only thing left to do I increasingly felt insignificant with no chance of ever seeing my life getting better The regrets the loneliness the sadness the adversity and a deep sense of helplessness just seemed insurmountable It had been a long and hard battle Eventually it is possible to overcome and suicide most probably never is the solution By reading this book you will have a glimpse of my journey through depression and my fight to resist committing suicide Hopefully this will encourage you not to give up on yourself as well and share your story Or maybe you can be inspired to help someone you care about    **The Effects of lead upon healthy individuals** Timothy Field Allen,1878    The Lancet ,1893
