Suicide Explained The Australian Experience:

The International Handbook of Suicide and Attempted Suicide Keith Hawton, Kees van Heeringen, 2000-11-21

Recent research in the area of suicidology has provided significant new insights in the epidemiological psychopathological and biological characteristics of suicidal behaviour. The International Handbook of Suicide and Attempted Suicide is the first book to bring together this expertise and translate it into practical guidelines for those responsible for policy issues and for those involved in the treatment and prevention of suicidal behaviour. Leading international authorities provide a truly comprehensive and research based reference to understanding, treating and preventing suicidal behaviour. They explore concepts and theories which best guide work within this field and detail key research which has supported conceptual developments, preventive interventions and clinical treatment. No self respecting worker in deliberate self harm and suicide prevention either clinical or research can afford to be without access to this comprehensive handbook. Possession and regular use may well become a marker of serious involvement in the subject. This is the most comprehensive up to date informative and well written source of information on suicide and suicidal behaviour, an invaluable work of reference which will be essential for clinicians and researchers for many years to come.

The Gender of Suicide Katrina Jaworski, 2016-03-09 Drawing on diverse theoretical and textual sources, The Gender of Suicide presents a critical study of the ways in which contemporary society understands suicide, exploring suicide across a range of key expert bodies of knowledge. With attention to Durkheim's founding study of suicide as well as discourses within sociology, law, medicine, psychology and newsprint media, this book demonstrates that suicide cannot be understood without understanding how gender shapes it and without giving explicit attention to the manner in which prevailing claims privilege some interpretations and experiences of suicide above others. Revealing the masculine and masculinist terms in which our current knowledge of suicide is constructed, The Gender of Suicide explores the relationship between our grasp of suicide and problematic ideas connected to the body, agency, violence, race and sexuality. As such, it will appeal to sociologists and social theorists as well as scholars of cultural studies, philosophy, law and psychology.

Clinical Challenges Judy Lumby, 2020-07-30 Nurses work across the health care system in a great variety of roles. From patient care to administration, nurses see where the pressures are and how well we are managing to look after some of the most vulnerable people in our society. Clinical Challenges explores contemporary issues central to nurses' work. Part I explores clinical concerns such as pain and wound management, the role of the nurse practitioner and the effects of extending life. For many years the health sector has been coping with cutbacks in government funding and Part II examines how this impacts on the way we handle social illnesses such as suicide and drug dependence as well as the needs of our growing ageing population. Part III looks at management issues affecting nurses, including the growing use of business strategies and rhetoric.
