Summertime Criterion Collection:

The Epic Films of David Lean Constantine Santos, 2011-09-22 Widely regarded as one of cinema's most accomplished directors David Lean helmed such classics as *Brief Encounter*, *Great Expectations* and *Oliver Twist*. He twice received the Academy Award for best director and two of his films *The Bridge on the River Kwai* and *Lawrence of Arabia* won the Oscar for best picture. Both are featured on the American Film Institute's Top 100 with *Lawrence of Arabia* at number seven. Despite the awards and accolades for these motion pictures many critics often look more favorably upon the smaller films that Lean produced earlier in his career and in recent years his reputation as a director has diminished. In this study Constantine Santos seeks to restore these now undervalued epics to the elevated esteem they once held. Without dismissing the earlier works or regarding them as irrelevant to Lean's evolution as an artist this book shows that the epics if analyzed from certain vantage points are as worthy as any of Lean's previous films. In addition to Lean's Academy Award winning blockbusters Santos also provides close analytical looks at *Doctor Zhivago*, *Ryan's Daughter* and the director's final film *A Passage to India*. Santos argues that the epics show a progression and refinement of Lean's work and that they are thematically broader and feature more complex characterization than his earlier films. In his analyses Santos provides background material on the production of each epic insights into structure characters techniques and themes and a look into the relationship between the films and their literary sources. Written in a clear and engaging manner *The Epic Films of David Lean* will appeal not only to cinema students and scholars but also to the general fan of David Lean and his work. **Moving Image Cataloging** Martha M. Yee, 2007-10-30 Libraries archives and museums hold a wide variety of moving images all of which require the same level of attention to issues of organization and access as their print counterparts. Consequently the people who create collection level records and metadata for these resources need to be equally conversant in the principles of cataloging. Martha Yee covers both descriptive AACR2R, AMIM and FIAF rules and subject cataloging with a focus on LCSH. In the process the reader is encouraged to think critically and to be prepared to make decisions in ambiguous situations where solutions to problems are not always obvious or clearly dictated by specific rules. **The Video Source Book** David J.
