

### Cladograms for Tetrapoda

provides hypothesized evolutionary among a group of species based on early and derived characters.

CHARTER

As a cluster is a group of components, which often don't share the same characteristics, observed clusters are a common approximation. In other other words, in clusters there is a higher chance for interactions with other components within the cluster, than with components outside of it. These properties cluster boundaries become more and more complex, and with more small clusters.
