## **Suicide Squads:**

**Suicide Squads** Richard O'Neill, 2001 Sixty years ago both Allied and Axis soldiers went to war in suicidal or near suicidal machines. The men's bravery cannot be overestimated nor can the ingenuity and desperation that led to the development of such hazardous crafts. Richard O'Neill's *Suicide Squads* tells the story of these special attack forces focusing on the Imperial Japanese Army and Navy. O'Neill offers a detailed exploration of the evolution and types of explosive motorboats which offered the prospect of spectacular gain at little cost. Midget submarines, Japanese, Italian, German, and British manned as well as human torpedoes, human bullets, and kamikaze aircraft. He also describes the actions themselves, the attack on Pearl Harbor, the raid on Sydney Harbour, special forces missions at Guadalcanal, Midway, and Okinawa, among others. And he provides insights into the samurai and bushido codes of conduct that inspired ritual suicide.

## **Japanese Military Strategy in the Pacific War**

James B. Wood, 2023-06-14 A historical exploration of how Japan could have implemented military tactics that would have altered how World War II ended. In this provocative history, James B. Wood challenges the received wisdom that Japan's defeat in the Pacific was historically inevitable. He argues instead that it was only when the Japanese military prematurely abandoned its original sound strategic plan to secure the resources Japan needed and establish a viable defensible perimeter for the Empire that the Allies were able to regain the initiative and lock Japanese forces into a war of attrition. They were not prepared to fight. Japanese Military Strategy in the Pacific War persuasively shows how Japan's army and navy had both the opportunity and the capability to have fought a different and more successful war that could have influenced the course and outcome of World War II. It is therefore a study both of Japanese defeat and of what was needed to achieve a potential Japanese victory or at the very least to avoid total ruin. Wood's argument does not depend on single individual historical events or dramatic accidents. Instead, it examines how familiar events could have become more complicated or problematic under different but nevertheless historically possible conditions due to changes in the complex interaction of strategic and operational factors over time. Wood concludes that fighting a different war was well within the capacities of imperial Japan, underscoring the fact that the enormous task of achieving total military victory over Japan would have been even more difficult if the Japanese had changed strategy and the Allies had not fought as skillfully as they did. If Japan had traveled that alternate military road, the outcome of the Pacific War could have differed significantly from history.
