**Summer Mastitis** G. Thomas, H.J. Over, U. Vecht, P. Nansen, 2012-12-06 This Community meeting has been organised since over the past 15 years in different countries of Western Europe including Scandinavia a lot of research has been directed to the summer mastitis problem Summer mastitis in cattle is a well known disease which because of its abruptness and the difficulties concerned in defining the predisposing factors and the pathogens involved is hard to control Moreover as it is anticipated that in the transmission of the bacteria one or more dipterans are involved the complexity in defining the disease and hence co ordinating our scientific knowledge in relation to practical control was stimulus enough for this workshop to be organised Our aims can be summarised in the following goals 1 Exchange of information in the practical technical and scientific field in order to stimulate a co ordinated research approach at a time in which the cattle husbandry sector is under great economical stress 2 Inform research workers from countries where the disease is or seems to be not endemic on aspects that might be of interest for them in the approach of comparable problems 3 To draw up conclusions and recommendations with regard to future research activities in order to avoid needless duplication of effort

Andrews, Roger W. Blowey, Hugh Boyd, Roger G. Eddy, 2008-04-15 Bovine Medicine provides practical and comprehensive information on cattle disease and production and is a key reference for all large animal vets. Since the first edition was published in 1991 there have been significant improvements in disease control and management of cattle. Almost all parts of the book have been updated and completely rewritten. There are new chapters on surgery, embryo transfer, artificial insemination, ethno-veterinary medicine, and biosecurity, and a new consolidating chapter on the interaction between the animal environment management and disease. The previous edition has sold well all over the world and as a result of this a greater emphasis has been placed on conditions and their treatment in areas other than temperate regions. A new section entitled 'Global Variation in Cattle Practice' has been included with contributors discussing bovine medicine practice in their part of the world. All in all this is an outstanding resource for any practising vet and an excellent reference for veterinary students.

*Medical Entomology* B.F. Eldridge, J.D. Edman, 2012-12-06 This book is designed primarily as a textbook for graduate and postgraduate courses in Medical Public Health and Veterinary Entomology. Its uniqueness is that its emphasis is on disease as opposed to arthropods. It includes general discussions of epidemiology, transmission, disease control, vector control and disease surveillance. In addition it contains chapters oriented towards the many specific arthropod borne diseases. Furthermore the book discusses the many direct impacts that parasitic insects have on human and animal health. The arthropods themselves are dealt with in two introductory chapters. *Netherlands journal of veterinary science*, 1957

*Large Animal Internal Medicine - E-Book* Bradford P. Smith, 2008-06-02 Large Animal Internal Medicine 4th Edition features a problem based approach with discussions of over 150 clinical signs. This is the first internal medicine reference that enables you to efficiently diagnose horses, cattle, sheep and goats based on clinical observation and laboratory and diagnostic testing. With this user friendly format you can find essential information about specific diseases and reach a diagnosis by simply identifying the signs. A unique problem based approach with discussions of over 150 clinical signs and manifestations helps you quickly reach a diagnosis based on observations and laboratory tests. Causes of Presenting Signs boxes provide easy access to complete lists of common, less common and uncommon diseases associated with manifestations or signs of disease. Complete lists of diseases associated with a given lab abnormality in Causes of Abnormal Laboratory Values boxes help you easily interpret abnormalities in clinical chemistry, hematology, blood proteins and clotting tests. An expert team of over 180 authors contributing information in their areas of expertise ensures you are using the most accurate and up to date information available. Color plates accompanying Diseases of the Eye and Diseases of the Alimentary Tract enable you to visually recognize the clinical appearance of ophthalmologic conditions and alimentary tract disorders for quick and easy diagnosis and treatment. Six all new chapters provide in depth coverage of diagnostic testing, critical care and fluid
