Rudolf Steiner

The Harmony Of The Human Body Musical Principles In Human Physiology:

The Harmony of the Human Body Armin Johannes Husemann, 1994 Husemann applies musical principles as a method of gaining insight into the structure of the human body and the forces that work upon it. He seeks to utilize our experience of music to explain the physiological and anatomical relationships in the body and to illuminate the spiritual influences that determine physical development. Drawing on artistic exercises set out by Rudolf Steiner to develop a better understanding of these influences, the book explores the cosmic origins of human beings and the evolutionary laws that govern their development.

THE ELECTRONIC DOPPELGÄNGER RUDOLF STEINER, 2016 Large temptations will emanate from these machine animals produced by people themselves and it will be the task of a spiritual science that explores the cosmos to ensure all these temptations do not exert any damaging influence on human beings. In an increasingly digitised world where both work and play are more and more taking place online and via screens, Rudolf Steiner's dramatic statements from 1917 appear prophetic. Speaking of intelligent machines that would appear in the future, Steiner presents a broad context that illustrates the multitude of challenges human beings will face. If humanity and the Earth are to continue to evolve together with the cosmos and not be cut off from it entirely, we will need to work consciously and spiritually to create a counterweight to such phenomena. In the lectures gathered here, edited with commentary and notes by Andreas Neider, Rudolf Steiner addresses a topic that he was never to speak of again: the secret of the geographical or the ahrimanic doppelgänger. The human nervous system houses an entity that does not belong to its constitution, he states. This is an ahrimanic being which enters the body shortly before birth and leaves at death, providing the basis for all electrical currents that are needed to process and coordinate sense perceptions and react to them. Based on his spiritual research, Rudolf Steiner discusses this doppelgänger or double in the wider context of historic occult events relating to spirits of darkness. Specific brotherhoods seek to keep such knowledge to themselves in order to exert power and spread materialism. But this knowledge is critical, says Steiner, if the geographical doppelgänger and its challenges are to be understood.

The Essentials of Education Rudolf Steiner, 1998-02 5 lectures Stuttgart April 8-11 1924 CW 308 These talks were given during an educational conference in 1924. They are the last public lectures given by Rudolf Steiner in Germany. According to one member of his audience, Seventeen hundred people listened to him; the prolonged applause from this great crowd at the end of every lecture was deeply moving, while at the end of the last lecture the applause became an ovation that seemed as if it would never end. This kind of adoration was the result not only of who Steiner was as an individual but of what he accomplished as well. People had already begun to realize the potential and the promise for the future that Waldorf education held out to the children of the world. *The Essentials of Education* together with its companion book *The Roots of Education* present a remarkable synthesis of what Waldorf education is and what it can

become The Waldorf experiment had matured for five years since 1919 when Steiner helped to establish the first Waldorf school He had guided that school from its beginning observing very closely all that happened As a result he was able to distill and present the essentials of Waldorf education with elegance as well as with the urgency he felt for the coming times
