*The Harmony Within* Rolland Hein,1982 George MacDonald is a witness to the power of imagination By using the art of enchantment he is able to draw readers into another world seemingly more real than this one What was the power behind his

imagination and what drove MacDonald's art     Spinoza, Ecology and International Law Moa De Lucia Dahlbeck,2018-09-12  
This book addresses the use of Benedict Spinoza's philosophy in current attempts to elaborate an ecological basis for international environmental law. Because the question of environmental protection has not been satisfactorily resolved the legal debate concerning our responsibility for the environment has as evidenced in the recent UN report series Harmony with Nature come to invite calls for a new eco centric rather than anthropocentric legal paradigm. In this respect Spinoza appears as a key figure. He is one of the few philosophers in the history of western philosophy who cares and writes extensively about the roots of anthropocentrism the core issue of contemporary normative debates in ecology. And in response to the rapidly developing ecological crisis his work has become central to a re thinking of the human relationship with nature. Addressing the contention that Spinoza's ethics might provide a useful source for developing a new eco centred framework for environmental law this book elaborates a more nuanced understanding of Spinoza's philosophy. Spinoza cannot it is argued here simply be reduced to an eco ethicist. That is his metaphysics cannot be used as basis of an essentially naturalised or extended human morality. At the same time however this book argues that the radicality of Spinoza's naturalism nevertheless offers the possibility of developing a more adequate ecological basis for environmental law.
