**The Routledge Handbook of Translation and Memory** Sharon Deane-Cox, Anneleen Spiessens, 2022-05-29 The Routledge Handbook of Translation and Memory serves as a timely and unique resource for the current boom in thinking around translation and memory. The Handbook offers a comprehensive overview of a contemporary and as yet unconsolidated research landscape with a four section structure which encompasses both current debate and future trajectories. Twenty four chapters written by leading and emerging international scholars provide a cross sectional snapshot of the diverse angles of approach and case studies that have thus far driven research into translation and memory. A valuable far reaching range of theoretical, empirical, reflective, comparative and archival approaches are brought to bear on translational sites of memory and mnemonic sites of translation through the examination of topics such as traumatic postcolonial cultural, literary and translator memory. This Handbook is key reading for advanced undergraduates, postgraduates and researchers in translation studies, memory studies and related areas.

Handbook of the Language Industry Gary Massey, Maureen Ehrensberger-Dow, Erik Angelone, 2024-07-01 Digital transformation and demographic change are profoundly affecting the contexts in which the language industry operates the resources it deploys and the roles and skillsets of those it employs. Driven by evolving digital resources and socio ethical demands the roles and responsibilities deriving from the proliferation of new and emerging profiles in the language industry are transcending the traditional bounds of core activities and competences associated with prototypical concepts of translation and interpreting. This volume focuses on the realities in the language industry from the fresh perspective of current and emerging professional profiles and of the contexts and resources that condition and support them. It traces the industry's evolution, maps its current state and considers key aspects of its workplaces, actors and practices. In an age when artificial intelligence is challenging traditionally held views of human performance, it addresses the issue of where and how human agents add value to the industry's processes and products with a detailed research based consideration of the activities, competences, roles, responsibilities and tools that characterize the language industry of today and the near future.
