Advanced Modelling Techniques in Structural Design Feng Fu, 2015-04-07 The successful design and construction of iconic new buildings relies on a range of advanced technologies in particular on advanced modelling techniques In response to the increasingly complex buildings demanded by clients and architects structural engineers have developed a range of sophisticated modelling software to carry out the necessary structural analysis and design work Advanced Modelling Techniques in Structural Design introduces numerical analysis methods to both students and design practitioners It illustrates the modelling techniques used to solve structural design problems covering most of the issues that an engineer might face including lateral stability design of tall buildings earthquake progressive collapse fire blast and vibration analysis non linear geometric analysis and buckling analysis Resolution of these design problems are demonstrated using a range of prestigious projects around the world including the Buji Khalifa Willis Towers Taipei 101 the Gherkin Millennium Bridge Millau viaduct and the Forth Bridge illustrating the practical steps required to begin a modelling exercise and showing how to select appropriate software tools to address specific design problems

Building Information Modeling André Borrmann, Markus König, Christian Koch, Jakob Beetz, 2018-09-19 Building Information Modeling BIM refers to the consistent and continuous use of digital information throughout the entire lifecycle of a built facility including its design construction and operation In order to exploit BIM methods to their full potential a fundamental grasp of their key principles and applications is essential Accordingly this book combines discussions of theoretical foundations with reports from the industry on currently applied best practices The book s content is divided into six parts Part I discusses the technological basics of BIM and addresses computational methods for the geometric and semantic modeling of buildings as well as methods for process modeling Next Part II covers the important aspect of the interoperability of BIM software products and describes in detail the standardized data format Industry Foundation Classes It presents the different classification systems discusses the data format CityGML for describing 3D city models and COBie for handing over data to clients and also provides an overview of BIM programming tools and interfaces Part III is dedicated to the philosophy organization and technical implementation of BIM based collaboration and discusses the impact on legal issues including construction contracts In turn Part IV covers a wide range of BIM use cases in the different lifecycle phases of a built facility including the use of BIM for design coordination structural analysis energy analysis code compliance checking quantity take off prefabrication progress monitoring and operation In Part V a number of design and construction companies report on the current state of BIM adoption in connection with actual BIM projects and discuss the approach pursued for the shift toward BIM including the hurdles taken Lastly Part VI summarizes the book s content and provides an outlook on future developments The book was written both for professionals using or programming such tools and for students in Architecture and Construction Engineering programs

Architecture and Design: Breakthroughs in Research and Practice Management

Association, Information Resources,2018-11-02 Technological evolutions have changed the field of architecture exponentially leading to more stable and energy efficient building structures Architects and engineers must be prepared to further enhance their knowledge in the field in order to effectively meet new and advancing standards Architecture and Design Breakthroughs in Research and Practice is an authoritative resource for the latest research on the application of new technologies and digital tools that revolutionize the work of architects globally aiding in architectural design planning implementation and restoration Highlighting a range of pertinent topics such as design anthropology digital preservation and 3D modeling this publication is an ideal reference source for researchers scholars IT professionals engineers architects contractors and academicians seeking current research on the development and creation of architectural design

Landscape Architecture and Digital Technologies Jillian Walliss,Heike Rahmann,2016-02-12 Landscape Architecture and Digital Technologies explores how digital technologies are reshaping design and making in landscape architecture While the potentials of digital technologies are well documented within landscape planning and visualisation their application within design practice is far less understood This book highlights the role of the digital model in encouraging a new design logic that moves from the privileging of the visual to a focus on processes of formation bridging the interface of the conceptual and material the virtual and the physical Drawing on interviews and projects from a range of international designers including Sn hetta Arup Gustafson Porter ASPECT Studios Grant Associates Catherine Mosbach Philippe Rahm PARKKIM LAAC and PEG office of landscape architecture among others the authors explore the influence of parametric modelling scripting real time data simulation prototyping fabrication and Building Information Modelling on the design and construction of contemporary landscapes This engagement with practice is expanded through critical reflection from academics involved in landscape architecture programs around the world that are reshaping their research and pedagogy to reflect an expanded digital realm Crossing critical theory technology and contemporary design the book constructs a picture of an emerging twenty first century practice of landscape architecture practice premised on complexity and performance It also highlights the disciplinary demands and challenges in engaging with a rapidly evolving digital context within practice and education The book is of immense value to professionals and researchers and is a key publication for digital landscape courses at all levels

Handbook of Research on Emerging Digital Tools for Architectural Surveying, Modeling, and Representation Brusaporci, Stefano,2015-07-13 Technological revolutions have changed the field of architecture exponentially The advent of new technologies and digital tools will continue to advance the work of architects globally aiding in architectural design planning implementation and restoration The Handbook of Research on Emerging Digital Tools for Architectural Surveying Modeling and Representation presents expansive coverage on the latest trends and digital solutions being applied to architectural heritage Spanning two volumes of research based content this publication is an all encompassing reference source for scholars IT professionals engineers architects and business managers interested in current methodologies

concepts and instruments being used in the field of architecture **Learning Autodesk Revit 2015** Kristen Smith,Victoria Shipley,2014-05-01 Learning Revit 2015 is uniquely designed to be an effective learning tool in both self paced and classroom environments This courseware will take you through the essential areas of Autodesk Revit which will enable you to master the tools needed to efficiently create and document a BIM model The content is organized in such a way that it intuitively guides you through the design process In each lesson you learn about the design process or tool the steps required to be successful and then an exercise that walks you through those steps and options so you experience it in a real world design scenario After you master the essential aspects of Revit the book then becomes a valuable desktop reference enabling you to dive deeper into the concepts processes and tools that will make you more productive The information covered in this manual is written for Autodesk Revit or Autodesk Revit Architecture and is also applicable when working in Autodesk Revit MEP and Autodesk Revit Structure **Building Information Modelling (BIM) in Design, Construction and Operations**
