### **Transregional Connections in the History of East-Central Europe** Katja Castryck-Naumann, 2021-10-25

Transregional connections play a fundamental role in the history of East Central Europe. This volume explores this connectivity by showing how people from eastern and central parts of Europe have positioned themselves within global processes while in turn also shaping them. The contributions examine different fields of action such as economy, arts, international regulations and law, development aid and migration, focusing on the period between the middle of the nineteenth century and the end of the Cold War. The authors uncover spaces of interaction and emphasize that internal and external entanglements have established East Central Europe as a distinct region. Understanding the connectedness of this subregion is stimulating for the historiography of East Central Europe as it is for the field of global history.

**Transboundary Water Cooperation** Patricia Wouters, Huiping Chen, James E. Nickum, 2018-10-15. China and its neighbours face a series of water security issues in which international law plays a vital role. Paramount to both policymakers and researchers in the field of water law, the current status of transboundary water cooperation schemes and how these operate in China is of global significance. Grounded in international experience, this comprehensive volume provides readers with an up-to-date overview of current international transboundary water resource sharing policies and practices, including detailed case studies at both domestic and international levels. The authors discuss existing international laws, treaties and principles that may stimulate transboundary water cooperation and dialogue and then analyse a number of international experiences with treaties in North America, Eastern Europe and Central Asia. They take stock of China's water resource issues, legal practices and options, examine case studies of China's southern shared rivers and explore some innovative approaches to cooperative management of shared waters within China. The articles in this book were originally published in the journal *Water International*.

**Coopers International Journal**, 1900 Vols 27 no 5 May 1918 include a section in German. The open access publication of this book has been published with the support of the Swiss National Science Foundation. The massive accumulation of plastics in marine environments is one of the most pressing environmental concerns of our time. This book examines the relevant international legal framework applying to land-based sources of plastic pollution. Against the backdrop of the dynamics of recent policy formulation in this field, it outlines the main developments and provides a snapshot inventory of state obligations related to plastic pollution mitigation. *The Mitigation of Marine Plastic Pollution in International Law* identifies the main barriers and opportunities and points out the possible building blocks of an enhanced regime.

**Due Diligence in the International Legal Order** Heike Krieger, Anne Peters, Leonhard Kreuzer, 2020. Creating Knowledge over Distance Harald Bathelt, Sebastian Henn, 2025-06-04 Creating Knowledge over Distance shows that economic knowledge creation fundamentally depends on benefits from and is structured by temporary geographical proximity that is by economic actors meeting in person or interacting in a co present context to discuss business opportunities problems and solutions are face to face During the Covid 19 pandemic personal meetings often had to be reduced or were replaced by virtual meetings leading many observers to assume a fundamental reconfiguration of economic life in the future as face to face interaction may be substituted by virtual interaction through the use of new information and communication technologies While communication patterns certainly changed during this period this book demonstrates that the face to face meetings the authors investigate across a sequence of 11 chapters with different knowledge creation contexts are unlikely to be fully substituted by distant interactions and may even become more important over time The book develops the argument by systematically analyzing three configurations of knowledge transfers over distance 1 international community gatherings such as trade fairs delegation travel conventions and conferences 2 mobile business practices including intra firm business coordination inter firm projects producer user meetings and corporate expansions inter firm negotiations as well as 3 transnational networks related to transnational corporations and transnational migrant firms including new transnational firms new Argonauts and transnational family networks
