Ginzburg, 1964 **Arthur's Invariant Trace Formula and Comparison of Inner Forms** Yuval Z. Flicker, 2016-09-14 This monograph provides an accessible and comprehensive introduction to James Arthur's invariant trace formula a crucial tool in the theory of automorphic representations It synthesizes two decades of Arthur's research and writing into one volume treating a highly detailed and often difficult subject in a clearer and more uniform manner without sacrificing any technical details The book begins with a brief overview of Arthur's work and a proof of the correspondence between GL_n and its inner forms in general Subsequent chapters develop the invariant trace formula in a form fit for applications starting with Arthur's proof of the basic non invariant trace formula followed by a study of the non invariance of the terms in the basic trace formula and finally an in depth look at the development of the invariant formula The final chapter illustrates the use of the formula by comparing it for GL_n and its inner form G and for functions with matching orbital integrals
