L'architecture Moderne En France Tome I 1889-1940:

L'architecture en Algérie de 1830 à nos jours Vincent Bertaud du Chazaud, Soraya Bertaud du Chazaud, 2023-12-06 Cet ouvrage richement illustré présente l'évolution historique des lieux des édifices et des acteurs de l'architecture et de l'urbanisme en Algérie de 1830 fin de l'hégémonie ottomane au Maghreb à l'aube du XXI^e siècle dans un pays ayant recouvré son indépendance depuis un demi-siècle. Il met en lumière la créativité des réalisations, les expérimentations techniques et l'importance de l'héritage matériel et culturel. Le but de ce livre est de décrypter ce passé afin de donner des pistes de recherches et d'analyses pour l'avenir. Structurant autour de 1962 date de l'indépendance, l'ouvrage est rythmé par deux siècles. Ainsi, il met en évidence l'importation du modèle européen dans les villes où l'architecture locale fut parfois malmenée à la charnière des XIX^e et XX^e siècles avec la française pour les expositions universelles et coloniales, le goût pour l'orientalisme qui permit le sauvetage de quelques édifices ou ensembles urbains durant les années 1930, la construction dopée par la célébration du centenaire de la conquête de l'Algérie et influencée par l'Art déco en vogue après guerre, l'émancipation de l'Algérie qui devint un terrain d'expérimentation fabuleux pour les nouveautés architecturales et constructives du Mouvement moderne, l'indépendance, la diffusion de quelques projets importants confiés des architectes internationalement reconnus comme le brésilien Oscar Niemeyer puis l'intégration des premiers architectes algériens dans les ministères, les administrations ou les organismes techniques permettant des réalisations parfois inspirées de l'architecture ottomane. Depuis les années 1990, le virage libéral de l'état algérien qui impacte le statut des architectes qui toujours plus nombreux ouvrent des agences privées dans les grandes villes. L'ouvrage met ainsi en évidence de nombreuses réalisations architecturales remarquables pas seulement celles des principales villes d'Algérie que sont Alger, Oran et Constantine mais de tout son territoire comme Oranville, Chlef, Ghardaia. Ce livre véritable voyage dans l'histoire de l'architecture constitue une référence pour les architectes et tous les curieux désireux de prendre conscience des efforts de l'administration algérienne et des architectes algériens et étrangers pour dépasser les empreintes du colonialisme et créer une architecture ayant sa propre identité.

It traces the thinking of the individuals who have participated in it, their relationships and their involvement in the cultures where they lived and worked. In this way, buildings, their details and the documents used to make them can be read closely for cultural insights. Introducing the idea of reading buildings as cultural artefacts, this book presents perceptive readings by eminent writers which demonstrate the power of this approach. The chapters show that close readings of architecture and its materials can test commonplace assumptions, help architects to appreciate the contexts in which they work and indicate ways to think more astutely about design. The readings collected in

this innovative and accessible book address buildings specifications and photographs They range in time from the fifteenth century examining the only surviving drawing made by Leon Battista Alberti to the recent past projects completed by Norman Foster in 2006 and Herzog and De Meuron in 2008 They range geographically from France to Puerto Rico to Kazakhstan and they range in fame from buildings celebrated by critics to house extensions and motorway service areas Taken together these essays demonstrate important research methods which yield powerful insights for designers critics and historians and lessons for students

Resources of the City Bill Luckin, 2017-03-02 The field of urban environmental history is a relatively new one yet it is rapidly moving to the forefront of scholarly research and is the focus of much interdisciplinary work Given the environmental problems facing the modern world it is perhaps unsurprising that historians geographers political natural and social scientists should increasingly look at the environmental problems faced by previous generations and how they were regarded and responded to This volume reflects this growing concern and reflects many of the key concerns and issues that are essential to our understanding of the problems faced by cities in the nineteenth and twentieth centuries Addressing a variety of environmental issues such as clean water supply the provision retention of green space and noise pollution that faced European and North American cities the essays in this volume highlight the common responses as well as the differences that characterised the reactions to these trans national concerns
