Supercritical Fluid Extraction Mark McHugh,Val Krukonis,2013-10-22 Supercritical Fluid Extraction is a technique in which CO₂ is used under extremely high pressure to separate solution e g removing caffeine from coffee Separations is basic to all process industries and supercritical fluid extraction is a specific type which is receiving a high level of attention The book will combine basic

fundamentals with industrial applications The second edition has been expanded and updated and includes new chapters on chromatography and food processing this is an excellent book which is both instructive and amusing to read Its true value is neatly summarised in one of the closing sentences We have supplied you with the guidelines and criteria which you can now apply when considering supercritical fluids for your own needs Chemistry in Britain February 1995

Phosphoric Acid Rodney Gilmour,2013-12-12 The rise and rationalization of the industrial phosphates industry have gone hand in hand with the development and maturation of technologies to purify phosphoric acid In the 1960s and 70s driven by the exponential sales growth of the detergent builder sodium tripolyphosphate chemical producers raced to develop processes that would provide

a sufficiently pure phosphoric acid feedstock for manufacture to undercut thermal phosphoric acid made from phosphorus As environmental and political pressure led to a collapse in demand for sodium tripolyphosphate in the 1990s the commercial pressures to rationalize at plant and corporate levels rose such that only the fittest survived Phosphoric Acid Purification Uses Technology and Economics the first and only book of its kind to be written on this topic covers the development of purification technologies for phosphoric acid especially solvent extraction describing the more successful processes and setting this period in the historical context of the last 350 years Individual chapters are devoted to the key derivative products which are still undergoing active development as well as to sustainability and how to approach the commissioning of these plants The text is aimed at students of chemistry chemical engineering business and industrial history and to new entrants to the industry Solvent Extraction G. M. Ritcey,1988 Natural Product Extraction Juliana M Prado,Mauricio A Rostagno,2022-07-20 Natural products are used by the food pharmaceutical and cosmetics industries and extraction technologies and potential applications for plant extracts are of interest to many industrial sectors Extraction of natural products in an economic and environmentally friendly way is of high importance to all industries involved The second edition of this book presents an updated holistic in depth view of the more environmentally benign techniques available for the extraction of natural products along with their newest applications and case studies Conventional and emerging extraction techniques are discussed in detail New topics include enzymes pulsed electric energy and on line in line analysis Written for academics and industrialists working in both natural product extraction and green chemistry this new edition provides a valuable update on current trends in the field

Solvent Extraction Vladimir S Kislik,2011-11-04 The main challenge in modern solvent extraction separation is that most techniques are mainly empirical specific and particular for narrow fields of practice and require a large degree of experimentation This concise and modern book provides a complete overview of both solvent extraction separation techniques and the novel and unified competitive complexation solvation theory This novel and unified technique presented in the book provides a key for a preliminary quantitative prediction of suitable extraction systems without experimentation thus saving researchers time and resources Analyzes and compares both classical and new competitive models and techniques Offers a novel and unified competitive complexation solvation theory that permits researchers to standardize some parameters which decreases the need for experimentation at R D Presents examples of applications in multiple disciplines such as chemical biochemical radiochemical pharmaceutical and analytical separation Written by an outstanding scientist who is prolific in the field of separation science Chemical & Process Engineering ,1958 **Solvent Extraction Study of Metal Fluoroacetylacetonates** William Quernsey Scribner,1968 The solvent extraction properties of 1 1 1
