**Journal of Affordable Housing & Community Development Law**, 2002 *Innovative Initiatives in Growth Management and Open Space Preservation* Robert Hines Wilson, 2003 Abundant open space is a defining characteristic of the United States It has affected the nations history and cultural identity and during the last decade managing urban sprawl and protecting open space has become a major public policy challenge Today many state and local initiatives are attempting to answer an extraordinarily complex question How can communities accommodate new residents and businesses without sacrificing the important historic cultural ecological and social values within the built and natural environments that are so essential to quality of life In this report conducted by the LBJ School and the Community and Regional Planning Program of the UT Austin School of Architecture for the Congressional Research Service CRS the findings from 32 case studies in 15 states are presented The initiatives are evaluated in terms of issues addressed approach adopted nature of intergovernmental relations and partnerships scale and role of the federal government Characteristics of effective cases are identified as well as future challenges and opportunities This report is the second of a two part research project for the CRS The first report State Growth Management and Open Space Preservation Policies see [http://www.utexas.edu/lbj/pubs/books/prp\\_143.html](http://www.utexas.edu/lbj/pubs/books/prp_143.html) identified and categorized state government initiatives concerning growth management and open space preservation enacted since 1990 This inventory revealed the national scope of such initiatives and identified the most active states from which the 32 case studies in the second year of the project were drawn The Business of Sustainability Chris Laszlo, Karen Christensen, Daniel S. Fogel, Gernot Wagner, Peter J. Whitehouse, 2010-01-01 The Business of Sustainability is a core resource for policy makers members of the development community entrepreneurs and corporate executives as well as business and economics students and their professors It contains rich analysis of how sustainability is being factored into

industries across the globe with enlightening case studies of businesses serving as agents of change Contributing authors provide a groundbreaking body of research based knowledge They explain that the concept of sustainability is being re framed to be positive about business instead of being tied to the old notion of a trade off between business and society that is if business wins society and the environment must lose and they explore how economic development can contribute to building our common future
