Some Experiments In Four Dimensional Vision 1933:

The Fourth Dimension and Non-Euclidean Geometry in Modern Art, revised edition Linda Dalrymple

Henderson, 2018-05-18 The long awaited new edition of a groundbreaking work on the impact of alternative concepts of space on modern art In this groundbreaking study first published in 1983 and unavailable for over a decade Linda Dalrymple Henderson demonstrates that two concepts of space beyond immediate perception the curved spaces of non Euclidean geometry and most important a higher fourth dimension of space were central to the development of modern art The possibility of a spatial fourth dimension suggested that our world might be merely a shadow or section of a higher dimensional existence That iconoclastic idea encouraged radical innovation by a variety of early twentieth century artists ranging from French Cubists Italian Futurists and Marcel Duchamp to Max Weber Kazimir Malevich and the artists of De Stijl and Surrealism In an extensive new Reintroduction Henderson surveys the impact of interest in higher dimensions of space in art and culture from the 1950s to 2000 Although largely eclipsed by relativity theory beginning in the 1920s the spatial fourth dimension experienced a resurgence during the later 1950s and 1960s In a remarkable turn of events it has returned as an important theme in contemporary culture in the wake of the emergence in the 1980s of both string theory in physics with its ten or eleven dimensional universes and computer graphics Henderson demonstrates the importance of this new conception of space for figures ranging from Buckminster Fuller Robert Smithson and the Park Place Gallery group in the 1960s to Tony Robbin and digital architect Marcos Novak

Behind the Looking Glass Sherry Ackerman, 2009-01-23

Behind the Looking Glass offers a fresh perspective in the ongoing contemporary deconstruction of the Carroll Myth Through rigorous examination of numerous myths that have been hitherto unquestioned Ackerman skillfully positions Lewis Carroll in the theological and philosophical contexts of his time She uncovers a Carroll whose radical religio philosophical counter response to patriarchal materialism moved his intellectual journey intentionally or otherwise deep into the waters of mysticism The image of Carroll as a dreary Victorian conservative gives way to that of a man with wide intellectual parameters an inquiring mind and bold far sighted vision Behind the Looking Glass demonstrates how nineteenth century currents of spiritualism theosophy and occult philosophy co mingled with Carroll s interest in revived Platonism and Neoplatonism showcasing the Alice and Sylvie and Bruno books as unique points of conjunction between Carroll s intellect and spirituality The scholarship in this work while rigorous is softly mixed with the kind of academic frivolity that Carroll himself might have enjoyed Ackerman exposes a Carroll who having lost belief in the theological and mythological master plots of earlier eras turned toward the imaginative fiction of wonderlands rife with philosophical content in response to his instinctive hunger for cosmic coherence and existential order
