Sonderstab Musik:

Sonderstab Musik WILLEM DEBRIES, 1996-01-01 During the Second World War the Einsatzstab Reichsleiter Rosenberg was set up an organisation which aimed for the elimination of Jewish cultural life in the rest of Europe A Sonderstab Musik was also established staffed by distinguished German musicologists whose task was to locate musical manuscripts books and instruments Its initial target was the possessions of Jewish musicians and composers who had fled the Nazi regime but in the end it boiled down to a general confiscation and removal of Jewish possessions including those connected with music making This book describes the activities of the Sonderstab Musik in France Belgium and the Netherlands

Gestolen muziek

Anders Rydell, 2025-09-18 Anders Rydell beschrijft hoe de nazis tijdens de Tweede Wereldoorlog Europas muzikale erfgoedroofden Een indrukwekkende geschiedenis over roofkunst en de blijvende kracht van muziek De Joodse musici Wanda Landowska Shony Braun en Arthur Rubinstein maakten tijdens het interbellum furore in Duitsland en Europa Slechts een paar jaar later werden ze door de nazi's meedogenloos vervolgd Het doel de Joodse invloed op de Europese muziek voor eens en altijd uitwissen Gestolen muziek gaat over de vaak vergeten systematische plundering van Europa's muzikale erfgoed tijdens de Tweede Wereldoorlog Op aangrijpende wijze vertelt Anders Rydell over de getroffen musici componisten en instellingen Onschatbare muziekinstrumenten en manuscripten van meesters als Bach en Beethoven gingen voor altijd verloren Dit is een verhaal over de kwetsbaarheid van onze culturele schatten maar ook over gerechtigheid herstel en veerkracht zo benadrukt Rydell Ondanks de gruwelijke vervolgingen bleef muziek een bijzonder krachtige vorm van culturele verbinding en van verzet Op indrukwekkende wijze maakt Rydell de universele kracht van muziek invoelbaar Een

aangrijpend verhaal over de universele kracht van muziek

Music as Social and Cultural Practice

Melania Bucciarelli, Berta Joncus, 2007 The linking theme of the essays collected here is the intersection of musical work with social and cultural practice Inspired by Professor Strohm's ideas as is fitting in a volume in his honour leading scholars in the field explore diverse conceptualizations of the work within the contexts of a specific repertory over four main sections Music in Theory and Practice studies the link between treatises and musical practice and analyses how historical writings can reveal period views on the work in music before 1800 Art and Social Process Music in Court and Urban Societies looks at the social and cultural practices informing composition from the late Renaissance until the mid eighteenth century and interrogates current notions of canon formation and the exchange between local and foreign traditions Creating an Opera Industry focuses on how genre and artistic autonomy were defined in operas from diverse eras and countries explaining the role of literature and politics in this process Finally The Crisis of Modernity treats nineteenth century music offering new models for work and context to challenge reigning theories of the meaning of these terms Publisher's website

Music after Hitler, 1945-1955

Toby Thacker, 2017-07-05 The political control of music in the Third Reich has been analysed from several perspectives and with ever increasing sophistication However music in Germany after 1945 has not received anything like

the same treatment Rather there is an assumption that two separate musical cultures emerged in East and West alongside the division of Germany into two states with differing economic and political systems There is a widely accepted view of music in West Germany as free and in the East subject to party control Toby Thacker challenges these assumptions asking how and why music was controlled in Germany under Allied Occupation from 1945 1949 and in the early years of semi sovereignty between 1949 and 1955 The re education of Germany after the Hitler years was a unique historical experiment and the place of music within this is explored here for the first time While emphasizing political economic and broader social structures that influenced the production and reception of different musical forms the book is informed by a sense of human agency and explores the role of salient individuals in the reconstruction of music in post war Germany The focus is not restricted to any one kind of music but concentrates on those aspects of music professional and amateur live and recorded which appeared to be the mostly highly charged politically to contemporaries Particular attention is given to denazification and to the introduction of international music Thacker traces the development of a divide between Communist and liberal democratic understandings of the place of music in society The contested celebrations of the Bach Year in 1950 are used to highlight the role of music in the broader cultural confrontation between East and West Thacker examines the ways in which central governments in East and West Germany sought to control and influence music through mechanisms of censorship and positive support The book will therefore be of interest not only

Collecting and Provenance Jane Milosch,Nick Pearce,2019-10-28 The study of provenance the history of the creation and ownership of an artefact work of art or specimen provides insights into the history of taste and collecting illuminating the social economic and historic trends in which an object was created and collected It is as much a history of people as it is of objects and its study often reveals intricate networks of relationships patterns of activity and motivations This book promotes the study of the history of collecting and collections in all their variety through the lens of provenance and explores the subject as a cross disciplinary activity Perhaps for the first time in a publication it draws on expertise ranging from art history and anthropology to natural history and law looking at periods from antiquity through the 18th century and the Holocaust era to the present and materials from Europe and the Americas to China and the Pacific The issues raised are wide ranging touching on aspects of authenticity cultural meaning and material transformation and economic and commercial drivers as well as collector and object biography The book fills a gap in the study of collecting and provenance taking the subject holistically and from multiple standpoints better to reflect the widening interest in provenance from a range of disciplinary perspectives This book will be a service to the field from established scholars and museum professionals to students of collecting history cultural heritage and museum studies
