practitioner now needs to do for each client is to diagnose the problem copy the treatment plan from the book and place it in the client's chart. It's all there: the behavioral symptoms, other diagnostic possibilities, the objectives of treatment and short-term behavioral goals as well as the therapist's interventions to meet them. The plan even includes space to enter a summary of the session with room for your signature as required at the bottom of each page. Each diagnosis has been carefully researched and matched with the appropriate interventions for treating children. The Behavioral Management Guide can also be used as a teaching manual to train therapists on what to do in the treatment room and to help season.
