## **Something To Be Desired:**

**Something to Be Desired** Thomas McGuane, 1985-04-12 A funny rueful and beautifully rendered portrait of American manhood on the rocks from the highly acclaimed author of Cloudbursts and Ninety Two in the Shade In life Lucien Taylor has made several mistakes but the two most grievous are as follows leaving his wife and son to take up with his old flame Emily and putting up Emily's bail when she is arrested for murder The upshot is that Lucien is left stranded in Montana with a malodorous hot spring and a squandered sense of purpose As told by Thomas McGuane Lucien's attempt to recoup his losses makes for a book that says volumes about the lives of dogs and falcons the yearnings of sons for fathers and the skeptical truce that men and women sometimes reach when they get tired of fighting

## **The Epistemology of Desire and the**

**Problem of Nihilism** Allan Hazlett, 2024-07-12 Most people have wondered whether anything really matters some have temporarily thought that nothing really matters and some philosophers have defended the view that nothing really matters However if someone thinks that nothing matters if they are a nihilist about value then it seems that it is irrational for them to care about anything It seems that nihilism about value mandates total indifference This is the problem of nihilism Allan Hazlett addresses in The Epistemology of Desire and the Problem of Nihilism Hazlett argues that the problem of nihilism arises because desire and thus caring is a species of evaluation that admits of irrationality This contradicts the influential Humean view that desire does not admit of irrationality which has a ready solution to the problem of nihilism since desire does not admit of irrationality it cannot be irrational to care about something that you believe does not matter However following G E Anscombe Hazlett argues that desire has the same relationship to goodness as belief has to truth just as truth is the accuracy condition for belief goodness is the accuracy condition for desire This reveals desire as an appropriate target of epistemological inquiry in the same way that belief is an appropriate target of epistemological inquiry Desires can amount to knowledge in the same way that beliefs can amount to knowledge and crucially for the problem of nihilism desire admits of irrationality in the same way that belief admits of irrationality Nevertheless although it is obviously irrational to believe something that you believe is not true Hazlett argues that it is not irrational to desire something you believe is not good despite the fact that goodness is the accuracy condition for desire This provides a solution to the problem of nihilism and shows that nihilism about value can coherently be combined with the anti Humean view that desire is a species of evaluation

**Auditing Theory** Ian Dennis, 2015-06-05 Auditing is generally considered to be a particularly practical discipline This hampers theoretical research as does its complex nature The unquestioning acceptance and implementation of rules governing auditing practice could lead to poor outcomes This book provides a theory of auditing that underpins auditing practice Identifying the objectives of auditing in the context of financial reporting this book examines underlying beliefs to provide a deeper understanding of the concepts of auditing In analyzing the field from a theoretical perspective the author encounters important concepts such as materiality verification evidence risk and professional judgement Philosophical ideas

about the social construction of reality are employed to explain the role of theory in a building block of the business world This book is vital reading for auditing scholars globally whilst its conclusions offer an interesting case study in the philosophy of professional judgement

Practical Reality Jonathan Dancy,2000-08-03

Practical Reality is about the relation between the reason why we do things and the reasons why we should It maintains that current philosophical orthodoxy bowdlerizes this relation making it impossible to understand how anyone can act for a good reason In order to understand this Dancy claims we have to abandon current conceptions of the reasons why we act our motivating reasons as mental states of ourselves Belief desire explanations of action or purely cognitive accounts in terms of beliefs alone drive too great a wedge between the normative and the motivational Instead we have to understand a motivating reason as the sort of thing that could be a good reason for instance that the eggs are ready this rather than my believing that they are ready must be my reason for taking them off the cooker Most contemporary philosophers think that this view cannot be true Dancy aims to demonstrate that things can be as he thinks they must be By giving a fresh account of values and reasons he finds a place for normativity in philosophy of mind and action and strengthens the connection between these areas and ethics
