## **Surgical Decision Making:**

**Surgical Decision Making** Rifat Latifi, 2016-04-30 This text provides a comprehensive and state of the art overview of the major issues specific to the surgical decision making process These include patient s anatomy and pathophysiology as well as the magnitude of the injury at hand the surgeon s own physiologic and mental status training and experience and many other factors such as creativity leadership skills and overall biochemistry of the environment The text reviews theoretical as well as objective information that surgeons use to make intraoperative decisions in situations often with very limited data decisions that will decide between a patient s living or dying such as in trauma surgery and other complex surgeries How surgeons choose one technical approach over another in these situations is covered This book fills a critical need for resource materials on these topics and includes both theoretical as well as practical presentations of many typical patients seen in operating rooms around the world **Surgical Decision Making Beyond the Evidence Based Surgery** is written by academic and clinical practicing surgeons that face intraoperative decision situations on a daily basis and therefore provides a unique and valuable resource in the field for surgeons currently in training and for those already in clinical or research practice

**Surgical Decision Making** Lawrence W. Norton, Ben Eiseman, 1986-01 **Surgical Decision Making** Lawrence W. Norton, Glenn Steele, Ben Eiseman, 1993 *Surgical Decision-Making* Rifat Latifi, 2025-01-02 This revised and expanded new edition reviews surgical decision making in complex surgical procedures including making difficult decisions continuous awareness of the patient s physiologic status the biochemical profile endpoint resuscitation and the surgeon s own physiologic status Other specific surgical decisions are discussed such as when to operate and when not to operate re operations and operations in specific conditions and age groups This new edition addresses these and other elements that are important for the intraoperative and perioperative decision making process including basic questions that have not been answered appropriately in the literature Many of us make decisions based on current evidence but much of it based on a gut feeling or intuition or the gray hair effect among other techniques In this book the anatomy of such decisions is explored from a theoretical standpoint as well as objective data that we as surgeons use to make surgical decisions Nowhere else is the matter of how we make a decision often with a very limited amount of data decisions that will decide between someone living or dying more prevalent than in trauma surgery and other complex surgeries including the unplanned return to the operating room Our collective firsthand experience as surgeons points to a combination of factors contributing to our perioperative and intraoperative decision making process including education clinical know how mentoring and the creativity and excellence that come with long practice and strict discipline The second edition of **Surgical Decision Making Evidence and Beyond** provides a unique and valuable resource in the field for surgeons currently in training and for those already in clinical academic or community surgery practice **Surgical Decision Making** Robert C. McIntyre, Richard D. Schulick, 2019-03 Using a proven practical algorithmic approach **Surgical Decision Making** summarizes
