Management Lessons from the Great Explorers Ralph L. Kliem, 2022-02-20 The early explorers up through those of the early part of the last century were the supreme users of management practices that have been formalized today Their expeditions had all the characteristics of a business project goal setting strategizing applying finite resources risk taking keeping people dealing with competitors and many others During actual expeditions the leaders faced many risks issues and conflicts that challenge the best leaders today from small to large enterprises Like all projects and business ventures the expeditions met their goal either partially or entirely and in some cases even exceeded it or failed it completely Management Lessons from the Great Explorers selects the most famous and in some cases infamous explorers to discuss and analyze the good and bad management practices even though these explorers may have never called them management practices they used before during and even after their expeditions Each chapter provides historical background about one explorer and the details about their explorations The chapters then discuss the challenges the explorers faced when planning and executing

their expeditions and examine their successes and failures from a management perspective The book will help managers to Manage unexpected and potentially catastrophic risks Set goals that open up new horizons Communicate effectively with team members Lead teams through hardships and difficulties The final chapter gives lessons learned that managers may take from the book and apply to their own business undertakings These lessons include Learning from experience Having a strong sponsor and team Relying on data and information Applying risk management and adapting to changing circumstances Implementing unity of command and defining roles and responsibilities Identifying and understanding stakeholders Being decisive Being willing to say no [The Great Explorers](#) Robin Hanbury-Tenison,2018-08-09 What inspires explorers to push back the boundaries of the known world Why do they risk their lives in unforgiving conditions far from home How do they survive at the limits of human endurance Who are the great pioneers of land sea and space Where next This book charts the great expeditions of forty of the worlds most intrepid explorers from da Gama to Gagarin Gertrude Bell plotted the desert sands politics and poetry of Arabia Francis Garnier was driven almost insane on the banks of the Mekong Edward Wilson twice tried to reach the South Pole with Scott Nain Singh mapped the vast spaces of Tibet counting every step Written by a host of distinguished travel writers broadcasters and historians here are journeys to savour from every corner of the earth and beyond [The Lives and Achievements of the Great Explorers](#) James Leslie Mitchell,1942 Contains studies of Lief Ericsson Marco Polo Columbus Cabeza de Vaca Magellan Vitus Bering Mungo Park Richard Burton and Fridtjof Nansen
