## **The Greenhouse Effect:**

1992 Census of Retail Trade ,1994    **The Greenhouse Effect** Philip Neal,1992 What is the greenhouse effect Greenhouse gases including carbon dioxide methane CFC s nitrous oxide and ozone Climatic change Effect on ice caps and oceans Effects on living conditions Preventative measures Political responses\_    *The Greenhouse Effect* Darlene R. Stille,1990 Describes the causes and effects of the greenhouse effect and how it might be stopped    *Controlling the Greenhouse Effect* Joshua M. Epstein,Raj Gupta,2010-12-01 Roughly 30 percent of the solar radiation directed toward the earth is reflected directly back into outer space The remaining 70 percent is absorbed by earth and re emitted outward as long wave or infra red radiation While transparent to incoming solar radiation certain gases notably carbon dioxide nitrous oxide methane and chlorofluorocarbons absorb or trap this outgoing infra red radiation near the earth s surface producing an increase in temperature This is the so called greenhouse effect The greater the concentration of these greenhouse gases the more pronounced will be the effect Despite uncertainties the scientific consensus recorded at Villach Austria in 1985 was that the understanding of the greenhouse question is sufficiently developed that scientists and policy makers should begin an active collaboration to explore the effectiveness of alternatives and adjustments The recent scientific assessment of climate change conducted under the auspices of the UN Intergovernmental Panel on Climate Change has only strengthened the view that a concerted multilateral response is called for    *Greenhouse Gases* Julie Kerr Casper,2010 Covers varying opinions on greenhouse gases discussing their sources effect on the environment role in global warming and how they can be curbed

**The Greenhouse Effect** Erik Arrhenius,Thomas W. Waltz,1990 The development community needs to outline a policy and research program for sustainable economic development which addresses the implications of possible climate effects of greenhouse gases The greatest opportunities lie in the energy sector which should be the primary focus of attention The opportunities for public and private energy efficiency gains are compelling and suggest that the threat of global warming can be reduced by concentrating present efforts on improving energy efficiency of the global economy Energy policies implemented within the next few decades could substantially contribute to mitigating the warming effects of greenhouse gas emissions Uncertainties concerning the impact of greenhouse gas buildup on global climate are pervasive These uncertainties concern the regional magnitude and timing of potential warming as well as the prospects for cooperatively resolving their prospective global implications Most countries could significantly improve their production efficiencies in greenhouse gas emitting industries However because of the large potential for growth in atmospheric emissions in many countries the participation of all countries is crucial for stabilizing the level of greenhouse gases    *The Greenhouse Effect* Michael Bright,1991-01-01 Describes the greenhouse effect the gases that cause it how it affects the environment ways to reduce the emission of greenhouse gases and alternative cleaner sources of energy    **The Greenhouse Effect (A True Book: Understanding Climate Change)** Mara Grunbaum,2020-11-10 What controls Earth s temperature How do the

changes happening now compare to those that have happened in the past This book lays out how the makeup of Earth s atmosphere can affect everything living beneath it and how human activities from cutting down trees to burning fossil fuels are changing the climate worldwide Glaciers are melting Summers are heating up Sea levels are on the rise Climate change is affecting every corner of our planet and it s the subject of a lot of concern activism and debate STEM meets current events in this new A True Book set that offers readers the chance to learn about the causes and effects of climate change as well as how people around the world are reacting to it Students will read about the history and scope of the problem analyze the same kinds of evidence that scientists do and come away with tools that will help them respond to this pressing global issue This series covers Next Generation Science Standards core ideas including Weather and Climate Human Impacts on Earth Systems Conservation of Energy and Energy Transfer and Biodiversity and Humans *Carbon Dioxide and the Greenhouse Effect* United States. Congress. House. Committee on Science and Technology. Subcommittee on Investigations and Oversight,1984

*Ethics and Climate Change* Harold Coward,Thomas Hurka,2006-01-01 Faced with the prospect of global warming the anticipated rapid rise in global air temperatures due to the release of gases into the atmosphere we have two choices of how to respond adaptation or avoidance With adaptation we keep burning fossil fuels let global temperatures rise and make whatever changes this requires move people from environmentally damaged areas build sea walls etc With avoidance we stop warming from occurring either by reducing our use of fossil fuels or by using technology such as carbon dioxide recovery after combustion to block the warming effect Yet each strategy has its drawbacks adaptation may not be able to occur fast enough to accommodate the expected temperature increases but avoidance would be prohibitively expensive An ethically acceptable goal must involve some mixture of adaptation and avoidance Written by a team of scientists social scientists humanists legal and environmental scholars and corporate researchers this book offers an ethical analysis of possible responses to the problem Their analyses of the scientific and technological data and the ethical principles involved in determining whose interests should be considered point to a combination of adaptation and avoidance of greenhouse gas production They offer assessments of personal corporate government and international responsibility and a series of recommendations to aid decision makers in determining solutions and apportioning responsibility
