## **The Greening Of Industrial Ecosystems:**

**The Greening of Industrial Ecosystems** National Academy of Engineering, Advisory Committee on Industrial Ecology and Environmentally Preferable Technology, 1994-02-01 In the 1970s the first wave of environmental regulation targeted specific sources of pollutants. In the 1990s concern is focused not on the ends of pipes or the tops of smokestacks but on sweeping regional and global issues. This landmark volume explores the new industrial ecology an emerging framework for making environmental factors an integral part of economic and business decision making. Experts on this new frontier explore concepts and applications including Bringing international law up to par with many national laws to encourage industrial ecology principles. Integrating environmental costs into accounting systems. Understanding design for environment industrial metabolism and sustainable development and how these concepts will affect the behavior of industrial and service firms. The volume looks at negative and positive aspects of technology and addresses treatment of waste as a raw material. This volume will be important to domestic and international policymakers leaders in business and industry environmental specialists and engineers and designers
