**Primitive Groups of Transformations in Space of Four Dimensions** James M. Page, 1888      **Engaging Faculty in Group-Level Change for Institutional Transformation** J. Kasi Jackson, Amena O. Anderson, Lisa M. Dilks, Maja Husar Holmes, Christine E. Kunkle, James J. Nolan, Melissa Latimer, 2023-05-17

Diversifying the academic faculty remains an elusive goal marked by slow and uneven progress. This book describes an effective model for institutional transformation which is uniquely grounded in group level processes. Efforts at institutional transformation continue to center individual actors. This is evident in the proliferation of programs that train individuals on implicit bias search strategies and other diversity and inclusion based content as solutions for inequities in academia. Acknowledging the value of these approaches, this book adds a new focus on group level processes. It unifies research on gender and racial inequity with concepts from social psychological theories of group dynamics to present a model of change centered on professional adult learners including faculty and academic staff. The book details the implementation of group level processes based on insights from the learning sciences, higher education leadership, communication studies, and group facilitation to instill norms for a more equitable and inclusive institution. Drawing on quantitative and qualitative data to illustrate the impact of group level initiatives, the book offers recommendations to enable the application of this model in higher education contexts. This book will be of interest to researchers and graduate students studying institutional transformation, academic social justice, leadership, and faculty professional development, and to those interested in integrating justice and equity into team science, translational research, and other trans-inter and multi-disciplinary fields. *Dimensions of Shared Agency: A Study on Joint, Collective and Group Intentional Action* Giulia Lasagni, 2022-01-04

*Dimensions of Shared Agency* investigates the way in which standard philosophical accounts have been dealing with the issue of collective actions. In particular, the book focuses on the Big Five of analytical social ontology, namely Michael Bratman, Margaret Gilbert, Philip Pettit, John R. Searle, and Raimo Tuomela, and their accounts of shared collective intentions and actions. Through systematic readings of different positions in the debate, the author proposes original ways of analyzing and classifying current theories of shared agency according to whether they advance a member level or a group level account of shared agency. While member level accounts (MLA) are theories of shared agency based on individuals' attitudes and actions, group level accounts (GLA) give attention to the group of individuals considered as a whole, i.e. as an agent itself. Criticism arises against the idea that the Big Five have proposed stable group level accounts suitable for explaining the case of shared agency as a group level phenomenon. The widespread tendency in the debate is to endorse a perspective called holistic individualism, which maintains that high level explanations are objective even though social facts are ontologically reducible to facts about individuals. Lasagni argues that as long as holistic individualism is held, the GLA is

reducible to the MLA because holistic individualism upholds ontological individualism based on a deep individualistic premise fixing the special status of individual agents as natural persons The premise makes the claim to treat groups as agents contradictory to the general framework of the theory This book profiles an alternative interpretation according to which agency should be considered as a functional kind which is equally instantiated by different systems such as individual human beings and organized social groups In this way the author claims the reduction of the social can be avoided Dimensions of Shared Agency will be of interest to doctoral students researchers and scholars interested in social ontology and the philosophy of the social sciences It can also be utilised as supplementary reading or an introduction to philosophy students and scholars who are first approaching the philosophy of collective intentionality and shared agency **Group**
