Sourcebook On The New Immigration:

The New Immigration Leif Jensen, 1989-03-24 Lofty sentiments notwithstanding the United States has consistently sought to exclude impoverished immigrants from entering the country on the grounds that many become dependent on social welfare institutions Leif Jensen thoroughly explores the nature of poverty and public assistance utilization among immigrants to the United States during the years 1960 to 1980 Among the questions he explores are Has there been an increase in the level of poverty and the degree of public assistance utilized by immigrants to the United States during the past twenty years How do these levels compare to those for native born Americans and across key racial and ethnic groups How do individual and family characteristics affect the propensity of families to be poor or to receive public assistance Following an introduction to the study as a whole Jensen presents theoretical issues that bear on differences in poverty and welfare use He reviews U S immigration history with particular emphasis on those aspects that are relevant to poverty and the receipt of public assistance The chapters that follow review methodological issues then present the results of Jensen s empirical analysis two chapters focus on poverty at the family level and two consider public assistance utilization These chapters build a conceptual background for a multivariate model of poverty at the family level Because the mere propensity to receive public assistance is only one aspect of the welfare burden imposed by a particular group the author also examines the absolute amount of public assistance received Finally he synthesizes the key findings of his empirical analysis drawing conclusions regarding the pervasiveness of poverty and actual public assistance receipt among new immigrants Jensen s thorough analysis and provocative conclusions make this book essential reading for those interested in sociology demography economics and political science

novel analysis of contemporary Asian and Pacific Islander immigration to the United States offers the most up to date
synthesis of findings on global migration today It presents a series of principles regarding new double step patterns in
population movements at the end of the twentieth century This discussion of new paths and modes of world migration in a
rimless world is intended for a broad inter disciplinary audience of students teachers and professionals in ethnic studies U S
history Asian and Asian American studies studies relating to the Pacific Rim sociology demographics and international
relations This study of multi level and multi directional global migration opens with an analysis of world migration theory
macro and micro factors in international migration and a review of research about recent migration patterns Next this study
offers twenty seven propositions about factors that have affected decisions of peoples to move elsewhere their adjustment to
new countries their return migrations and the impact of international migration Asian and Pacific Islander immigration to the
United States is examined along with extensive data based on U S immigration records This fourth wave of immigration to
the United States is then analyzed in detail Accompanying this data and analysis is a model of double stepwise international
migration extremely useful for those studying the intricacies of global patterns of migration Barkan concludes with other
data on mobility variables an appendix and an index
