Robert Young Hayne

Southern Honor:

Southern Honor Bertram Wyatt-Brown, 1982 Explains the importance of the concept of honor in Southern society and examines family relationships courtship marriage miscegenation dueling and slave insurrections **The Changing American Countryside** Emery N. Castle, 1995 The literature on rural America to the extent that it exists has largely been written by urban based scholars perpetuating out of date notions and stereotypes or by those who see little difference between rural and agricultural concerns As a result the real rural America remains much misunderstood neglected or ignored by scholars and policymakers alike In response Emery Castle offers *The Changing American Countryside* a volume that will forever change how we look at this important subject Castle brings together the writings of eminent scholars from several disciplines and varying backgrounds to take a fresh and comprehensive look at the forgotten hinterlands These authors examine the role of non metropolitan people and places in the economic life of our nation and cover such diverse issues as poverty industry the environment education family social problems ethnicity race religion gender government public policy and regional diversity The authors are especially effective in demonstrating why rural America is so much more than just agriculture It is in fact highly diverse complex and interdependent with urban America and the international market place Most major rural problems they contend simply cannot be effectively addressed in isolation from their urban and international connections To do so is misguided and even hazardous when one fourth of our population and ninety seven per cent of our land area is rural Together these writings not only provide a new and more realistic view of rural life and public policy but also suggest how the field of rural studies can greatly enrich our understanding of national life *A Southern Planter* Susan Dabney Smedes, 1887 **The Oral Character of Southern Literature** Clay Morton, 2008 The literary distinctiveness of the American South has been an object of much scholarly discussion Although oratory and folklore are often cited as influences on the unique character of Southern literature no scholar in the field has yet explored orality as a possibly deterministic factor in the shaping of the region's literary and cultural identity This study makes use of the extensive research available on the differences between oral and literate thought and expression in order to argue that practically every distinguishing factor of Southern literature may be traced the region's oral orientation To this end empirical findings on identifiably oral linguistic strategies narrative structures and epistemologies are fruitfully synthesized with analyses of works by Southern authors including James Weldon Johnson Eudora Welty William Gilmore Simms William Faulkner Donald Davidson and Zora Neale Hurston These discussions provide not only a new theory of Southern exceptionalism but also a new theoretical framework for reading Southern texts **Southern Historical Society Papers** Southern Historical Society, 1876 *The Constitutional and Political History of the United States: 1846-1850.
