Soviet And Post Soviet Telecommunications:

Soviet And Post-Soviet Telecommunications Robert W Campbell, 2019-06-04 THE TELECOMMUNICATIONS SECTOR constitutes a vital infrastructure for a modern society It is part of the working mechanism of a decentralized flexible and dynamic market economy It also serves as the foundation for a pluralistic political system with a government accountable to the public The crucial role of communications is increased by synergistic interaction between globalization of economic processes and the continuing technical revolution in information processing and communication One of the most revealing indicators of the inability of the old Soviet system to attain its goal of matching the performance of the advanced market economies was its neglect of telecommunications The sector was always treated as an orphan devalued because in line with a peculiar Marxian notion it was not considered part of material production 1 and was starved of attention and resources
