The Meditators:

Parapsychology Etzel Cardeña, John Palmer, David Marcusson-Clavertz, 2015-08-14 Many people have experienced such unusual phenomena as dreams that later seem to correspond with unforeseeable events thinking of a long lost friend just before he or she unexpectedly calls or the ability to feel the presence of deceased loved ones. What many do not realize is that these types of experiences have been researched for more than a century by eminent scientists including Nobel laureates. Most of these researchers have concluded that some of these phenomena do occur although we are far from explaining them to everyone's satisfaction. This book is the first in almost 40 years to provide a comprehensive scientific overview of research in the field of parapsychology explaining what we know and don't know about so-called psi phenomena such as telepathy, precognition or psychokinesis. Contributors evaluate the evidence for these phenomena accounting for factors such as selective memory, wish fulfillment and incorrect methods or analyses in some cases offering psychological, physical and biological theories. Instructors considering this book for use in a course may request an examination copy here.

The Telomere Effect Elizabeth Blackburn, Elissa Epel, 2017-01-03 One of the Best Brainy Books of This Decade The Guardian A ground-breaking book on the history of Telomeres offering fresh advice on how to slow down aging and lengthen life. Nobel prize-winning Doctor Elizabeth Blackburn and leading health psychologist Dr. Elissa Epel have discovered biological markers called Telomeres which can help to understand how healthy our cells are and what we can do to improve them. The book specifically looks at ideas including how biological age is not chronological age, a biological basis for the mind-body connection, how sleep and diet can affect telomeres and shockingly how mothers who are highly stressed during pregnancy have children with shorter telomeres. It also offers tools and advice on how to determine cellular age and telomere health. Doctor Elizabeth Blackburn was awarded the Nobel Prize in Physiology or Medicine in 2009 for her discovery of telomeres and their role in the ageing process and has previously been named in TIME magazine's 100 Most Influential People. Dr. Elissa Epel is a leading health psychologist who has conducted pioneering research uncovering the psychobiological mechanisms related to how stress ages us and compromises our health from emotional eating to unhealthy storage of abdominal fat to telomere shortening.

Meditation Deane H. Shapiro (Jr.), Roger N. Walsh, Many claim that meditation is effective in the treatment of many ailments associated with stress and high blood pressure and in the management of pain. While there are many popular books on meditation few embrace the science as well as the art of meditation. In this volume Shapiro and Walsh fill this need by assembling a complete collection of scholarly articles. *Meditation: Classic and Contemporary Perspectives*. From an academic rather than a popular vantage the volume takes the claims and counterclaims about meditation to a deeper analytical level by including studies from clinical psychology and psychiatry, neuroscience, psychophysiology and biochemistry. Each selection is a contribution to the field.
