The Merxyn Experiment:

Research in Science Education in Europe Geoff Welford, Jonathan Osborne, Phil Scott, 2005-08-02 A range of topical issues and concerns at the forefront of research in science education in Europe are examined in this text. The contributors are science educators and researchers from throughout Europe

Using Multimodal Representations to Support Learning in the Science Classroom

Brian Hand, Mark McDermott, Vaughan Prain, 2015-11-06 This book provides an international perspective of current work aimed at both clarifying the theoretical foundations for the use of multimodal representations as a part of effective science education pedagogy and the pragmatic application of research findings to actual classroom settings. Intended for a wide ranging audience from science education faculty members and researchers to classroom teachers, school administrators and curriculum developers, the studies reported in this book can inform best practices in K-12 classrooms of all science disciplines and provide models of how to improve science literacy for all students. Specific descriptions of classroom activities aimed at helping infuses the use of multimodal representations in classrooms are combined with discussion of the impact on student learning. Overarching findings from a synthesis of the various studies are presented to help assert appropriate pedagogical and instructional implications as well as to suggest further avenues of research

Handbook of Research on Science Education, Volume II Norman G. Lederman, Sandra K. Abell, 2014-07-11 Building on the foundation set in Volume I, a landmark synthesis of research in the field, Volume II is a comprehensive state-of-the-art new volume highlighting new and emerging research perspectives. The contributors, all experts in their research areas, represent the international and gender diversity in the science education research community. The volume is organized around six themes: theory and methods of science education, research, science learning, culture, gender and society, and science learning, science teaching, curriculum and assessment in science, science teacher education. Each chapter presents an integrative review of the research on the topic it addresses, pulling together the existing research working to understand the historical trends and patterns in that body of scholarship, describing how the issue is conceptualized within the literature, how methods and theories have shaped the outcomes of the research, and where the strengths, weaknesses, and gaps are in the literature. Providing guidance to science education faculty and graduate students and leading to new insights and directions for future research, the *Handbook of Research on Science Education*, Volume II is an essential resource for the entire science education community
